

THE MODULAR MEDICINE TROLLEY FOR CLINICS AND NURSING HOME APPLICATIONS.

MEDICINE DISTRIBUTION

SAFE. EFFICIENT. MODULAR.

“Medicine distribution is not only much simpler and more efficient with the KANYA medicine trolley, but at the same time has also become much safer.”

Petra Schöni, Senior Nurse Senevita Burgdorf

The KANYA medicine trolley is the ideal solution for all hospitals, nursing homes and clinics. Its robust construction and the diverse closing mechanisms that are available make the dispensing of medicines simpler and safer. Its modularity ensures that there is a suitable solution for every setting.

Efficient:

Its advanced designed and very stable construction maximise efficiency, so that the distribution of medicines is simplified and optimised. Furthermore, the materials used make the trolley very easy to clean.

Stable:

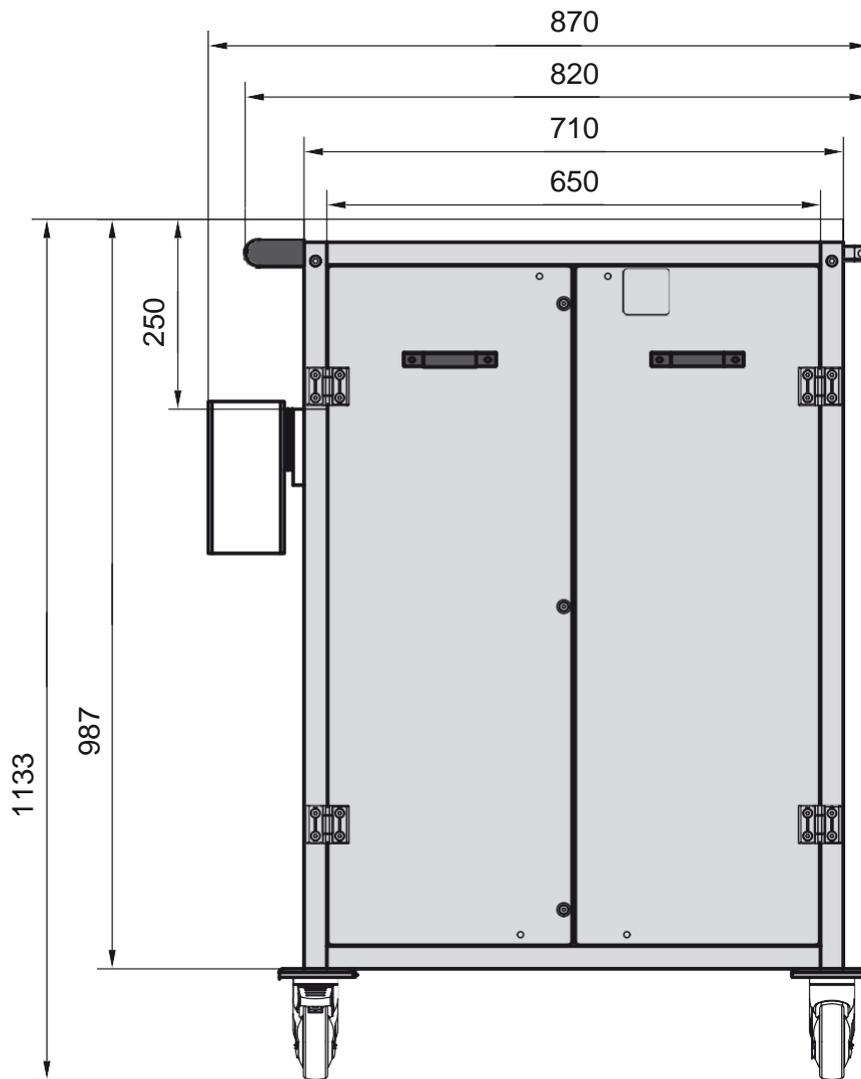

The KANYA medicine trolley is also extremely stable. Its rollers are designed for clinics and hospital use, so that the trolley is also manoeuvrable and easy to handle over longer distances.

Safe:

Distribution is made safer not only by the clearly identified trays, but the closing mechanism, which can be personally programmed with the included badge or other already existing data medium (with RFID chip), also ensures that only qualified employees have access to the medicines.

Application:

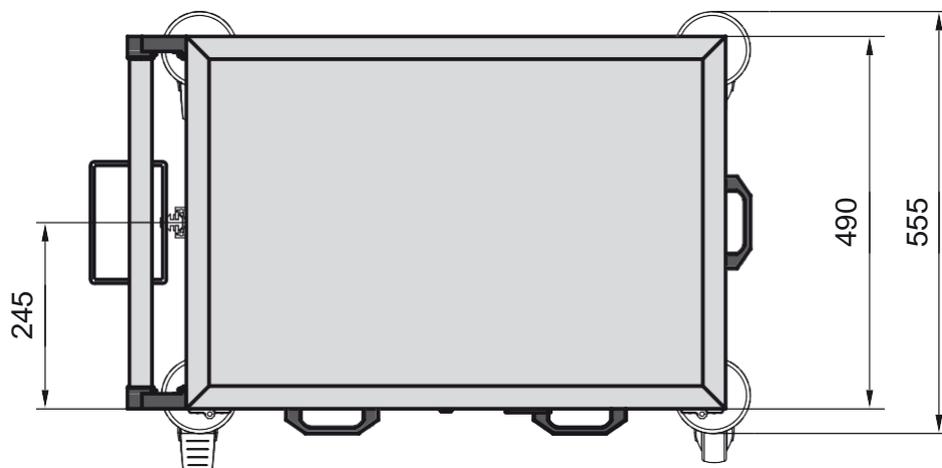

The KANYA medicine trolley is the ideal partner for all health professionals in clinics, nursing homes and hospitals.

Design:

The KANYA medicine trolley is available as a standard model or in desired sizes. Colours can be selected on request. Access to the medicines from the side is possible. The trolley is optionally available with traceable access and remote client administration.

Included in delivery:

- 5 ISO extendible modular shelves
- 1 tray
- RFID controlled lock (number of badges selectable)
- Extendible work surface for additional shelves
- Integrated waste disposal with selectable colours on request)

KANYA

SIMPLE. INGENIOUS.

MEDICINE DISTRIBUTION:
SAFE. EFFICIENT. MODULAR
