Our service range

- ✓ range of articles ex stock
- ✓ extrusions cut to measure and processed
- ✓ consultation and engineering
- ✓ pre- or completely assembled
- ✓ external material procurement

Company video

Aluminium extrusion system – modular with simplicity

Kanya AG is a leading global supplier of aluminium extrusion system and stands out due to its Swiss quality. Based on the Kanya aluminium extrusion system, we supply design solutions in the sectors of special-purpose engineering, automation and the machine manufacturing industry.

In our headquarters in Rüti ZH (Switzerland), over 50 employees work in the sectors of sales, engineering, production and assembly. The modern industrial building with an area of over 3500m² offers optimal requirements for efficient order processing. Globally, we work together with over 20 long-standing independent partners. Our international contractual partners have their own warehouses and the associated production infrastructure. This network means that Kanya profiles and components are available to all intents and purposes over the whole world.

Milestones

1974

Kanya AG founded by Gertrud Rüegg

1982

Walter Bär participates in Kanya and manages the technical department.

1997

Opening celebration – new location in Rüti (Switzerland)

2013

Foundation of branch office Kanya China

2016

Extension of the factory building by 1'200 m² in Switzerland

1975

Patenting of PVS[®] extrusion connection system

1990

Worldwide more than ten representatives

2008

Succession plan through Bachtel Group (Clemens Ruckstuhl and André Müller)

2014

Company anniversary – 40 years Kanya AG

2021

New lengthwise processing machine

Our products

Extrusion Connecting System PVS®

With the aluminum modular system, you will solve any construction task professionally, flexibly, durably and reliably. Our product range includes over 150 different profiles which are easily and safely connected with our connectors.

Tube Clamp System RVS®

The Tube Clamp System provides creative and versatile solutions in response to a huge variety of requirements in the field of machine and apparatus construction. An optimal static is guaranteed thanks to the precise machined clamping elements.

Accessories

The Kanya modular system allows an easy fixing of various accessories. The assortment of over 1'500 articles ranges from end caps, base connecting elements, panels up to angle extrusions and much more.

50 base extrusion

These extrusions are used wherever very high loads with small deflections must be supported.

45 base extrusion

Ideal complement to other extrusions with base 50, 40, 30 and 20.

40 base extrusion

The universal extrusion is extremely stable and has a good price-performance ratio.

30 base extrusion

Lightweight but stable extrusion for simple constructions and universal use.

20 base extrusion

Can be used for low load-bearing and filigree constructions.

Aluminium extrusion from A-Z

Kanya system advantage

Due to the same nutdimension all different parts are compatible with eachother.

Product line

Workplace systems

Kanya Ergoplace offers efficient, ergonomic and tailor-made solutions for workplaces in industry and business. The range includes tables with height-adjustable lifting columns, lights, brackets, shelves, base units and much more. Based on the Ergoplace checklist we will be happy to find out your needs.

KLINK®

The Kanya Klink system makes it even easier to keep things in order, maintain an overview thus increase productivity. The Klink system consists of shelves of different sizes, a suspension extrusion and suspension rails which can be easily hooked into the workstation. This reaches finally an end to the search for tools.

Machining doors

Kanya Safe is a modular system solution for safety doors and protective enclosures. Numerous solutions can be implemented in a wide range of applications with the flexible modules and components. Kanya Safe offers the right solution for every requirement, regardless of whether it is for a machine housing, a double lifting-door or a multi-part safety door. The system solution can be altered or modified at any time to meet the requirements.

Machine base frame and housing

Workplace systems

Operating material

Machining door

Automation and conveyor technology

Protective cabinet and noise protection

**You have ideas.
We have the solution.**

Machine base frame and housing

Today, machine claddings do not just fulfil the task of protecting persons, but rather they are an integral part of the machine with a high demand on design. For a high-quality cladding that is tailored to the machine, the versatility of the Kanya aluminium profile modular constructions present the ideal prerequisites.

The standard anodised profiles can also be powder-coated to the desired colours. In combination with a wide variety of surface elements such as acrylic glass, wood and metal, the opportunity presents itself for setting the emphasis on integrating the machine in a sophisticated overall appearance.

Kanya system benefits

- ✓ high protective function such as safety, noise and sound protection
- ✓ sophisticated overall appearance (design)
- ✓ according to the machinery directives

Solutions

Machine housing

Plastic parts processing after injection moulding process

Properties:

- protected region
- several opening ranges
- robust design and stability

Machine top

Injection moulding machine for PET manufacture.

Properties:

- dust protection
- sliding frames

Machine base frame

Transport and production module in the circuit boards industry

Properties:

- rigid rack structure
- attractive design
- modular construction

Workplace systems

The labor law requires an ergonomic design of workplaces. Optimised work processes and a corresponding infrastructure improve productivity. The ergonomic aspect is an important component of a workplace. Heightadjustable workbenches, optimal bench dimensions, lighting and individual tool positioning are just a few examples of a direct or indirect impact on the health, motivation and performance of the employees.

Kanya Ergoplace satisfies all conditions for an ergonomically oriented workplace system. Workplace systems are easy to assemble, are based on a modular design and can be extended flexibly.

Solutions

Packaging workplace in the logistics

- Properties:
- height-adjustable desks and workbenches
 - optimal desk dimensions
 - individual storage shelves

Assembly workstation in the production area

- Properties
- height-adjustable desks and workbenches
 - individual tool positioning
 - lighting depending on the work process

Interlinked workplace (assembly and production line)

- Properties:
- simple to complex solutions
 - modular and flexible

Kanya system benefits

- ✓ customized solution
- ✓ ergonomically optimized
- ✓ modular, flexible and simple installation
- ✓ «Industry 4.0» solution

Workplace systems Ergoplace

Operating material

Whether it be tool trolleys, medicine trolleys or a vehicle construction for a pick-up. Tailor-made solutions can be constructed using the Kanya profile connection system (PVS). Our engineering team has many years of experience in applications with the Kanya aluminium profile modular construction system.

We are equipped with the most modern IT systems with which we formulate solutions for you and set up the required list of items. Use our know-how and tell us your construction ideas.

Kanya system benefits

- ✓ tailor-made solution
- ✓ modular and flexible
- ✓ simple installation

Solutions

Operating tool trolley

- Properties:
- light base frame
 - multifunctional mounting options
 - easy to extend at any time

Workshop trolleys

- Properties:
- lower cabinet integrated as a trolley
 - light frame

Medicine trolley

- Properties:
- robust design and stability
 - personalised access with RFID chip
 - simple cleaning of the material
 - good running characteristics of the rollers

Machining door

Machine doors safely separate the work area between human and machine. But also the opening and closing times, which directly influence the increase in productivity, are also relevant to the safety aspects.

Kanya Safe is a modular system solution for safety doors and protective enclosures. Numerous solutions can be implemented in a wide range of applications with the flexible modules and components. Kanya Safe offers the right solution for every requirement, regardless of whether it is for a machine housing, a double lifting-door or a multi-part safety door. The system solution can be altered or modified at any time to meet the requirements and thus represents a sustainable investment.

Kanya system benefits

- ✓ simple, ready-to-install solution with drop guard
- ✓ robust construction and thin construction depth
- ✓ extremely compact design
- ✓ CE compliant (EC declaration of conformity)

Brochure Door solutions

Solutions

Double lifting-door

- Properties:
- high opening speed
 - minimal effort when opening and closing
 - laser resistant, resistant against contamination due to Kanya sliding guides
 - integrated protective machine door control system double-lifting door

Machine safety door

- Properties:
- free access for loading and unloading
 - double lifting-door

Laser protection lift door

- Properties:
- ready-to-install solution
 - robust construction
 - laser protection class 4

Automation and conveyor technology

In the manufacturing processes of today, economic flexibility is in particular demand. A wide variety of construction parts are assembled, processed or measured at increasingly shorter intervals on specially manufactured clamping and mounting devices.

The Kanya profile system ensures that the layout of the devices does not become a disproportional cost factor,. The versatility and modularity of the modular construction system enables the widest variety of requirements to be cost-effectively and readily adapted.

Kanya system benefits

- ✓ simple, ready-to-install solution
- ✓ robust construction and thin construction depth
- ✓ easy mounting of sensors and adapters
- ✓ flexible adjustments can be made later

Solutions

Table conveyor system with chain conveyor

- Properties:
- tight bends save storage space
 - easy to assemble

Conveyor system for an assembly system for automobile axles

- Properties:
- load capacities up to 400 kg/cassette
 - freely configurable
 - low-noise
 - robust and durable

Conveyor system for automation of a processing machine

- Properties:
- high modularity for complex layouts
 - used for loading and unloading of processing machines
 - robust and durable

Protective cabinet and noise protection

The effects of noise pollution at the workplace on concentration, performance and motivation as well as the well-being of the employees must not be underestimated. If the permissible threshold limits are continuously exceeded, sustained noise leads to health damage. For this reason, the Occupational Safety Act specifies very clear reference values that protect health and safety.

Kanya system benefits

- ✓ individual noise protection systems prevent health damage
- ✓ comply with the employment law (EU: Occupational Safety Act)
- ✓ protection against mechanical damage

Solutions

Protection cabin

Low-pressure cabin for the manufacture of power storage modules

Properties:

- extremely airtight construction
- ESD construction
- accessibility through large sliding doors

Noise protection

Noise protection cladding for winding machine electric motors

Properties:

- noise level reduction
- unhindered access through the door front with special noise protection glazing

Noise protection

Noise protection airlock for endurance test system of angles grinders

Properties:

- noise level reduction of 28 dB(A)
- total access to the test room
- unhindered access through the door front with special noise protection glazing

Extrusion tolerances, extract from EN 12020-2

1. Straightness tolerances

Cavity extrusions may not exceed the values stated in the table for the straightness tolerances h_1 . The deviation h_2 may not exceed a maximum of 0.3 mm over any length of $l_2 = 0.3$ mm.

Length l_1 in m	up 1 m	up 2 m	up 3 m	up 4 m	up 5 m	up 6 m
Tolerance h_1 in mm	0.7	1.3	1.8	2.2	2.6	3.0

2. Twist tolerance v

The length-dependent twist tolerance v for cavity extrusions is shown in the table.

Width b in mm	Flatness tolerance v in mm for lengths in mm					
	- 1000	> 1000-2000	- 2000-3000	> 3000-4000	> 4000-5000	> 5000-6000
- 25	1.0	1.5	1.5	2.0	2.0	2.0
> 25 - 50	1.0	1.2	1.5	1.8	2.0	2.0
> 50 - 75	1.0	1.2	1.2	1.5	2.0	2.0
> 75 - 100	1.0	1.2	1.5	2.0	2.2	2.5
> 100 - 125	1.0	1.5	1.8	2.2	2.5	3.0
> 125 - 150	1.2	1.5	1.8	2.2	2.5	3.0
> 150 - 200	1.5	1.8	2.2	2.6	3.0	3.5
> 200 - 300	1.8	2.5	3.0	3.5	4.0	4.5

3. Inclination tolerance w

Where sides are of unequal length, inclination tolerance shall be relative to the angle of the shorter side.

Width b in mm	Inclination tolerance w in mm	Width b in mm	Inclination tolerance w in mm
- 30	0.3	> 120 - 140	0.8
> 30 - 50	0.4	> 140 - 160	0.9
> 50 - 80	0.5	> 160 - 180	1.0
> 80 - 100	0.6	> 180 - 200	1.2
> 100 - 120	0.7	> 200 - 240	1.5

4. External tolerances

Width b, h in mm	Deviation in mm	Width b, h in mm	Deviation in mm
> 15 - 30	± 0.25	> 120 - 150	± 0.80
> 30 - 45	± 0.30	> 150 - 180	± 1.00
> 45 - 60	± 0.40	> 180 - 240	± 1.20
> 60 - 90	± 0.45	> 240 - 300	± 1.50
> 90 - 120	± 0.60		

Strength calculations

Load case 1

$$f [\text{mm}] = \frac{0.476 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

Example:

A counterweight with a max. load of 500 N is to be fastened to an extruded arm 800 mm long. What will be the deflection of a 40x40 mm C01-1 type base extrusion?

$$\text{Deflection } f = \frac{0.476 \times 500 \times 0.8^3}{11.70} = 10.42 \text{ mm}$$

Checking the bending stress:

$$\delta = \frac{M_b}{W \times 10^3}$$

δ = bending stress in N/mm²
 M_b = max. bending moment in Nmm
 W = section modulus in cm³

Example:

An 1800 N load is placed in the middle of a beam. The unsupported length is 1200 mm. The max. permissible deflection is 1.0 mm. What sort of extrusion should be used for the beam?

$$\text{Deflection } f = \frac{0.0074 \times F \times L^3}{I} \Rightarrow I = \frac{0.0074 \times F \times L^3}{f}$$

$$\text{Moment of inertia } I = \frac{0.0074 \times 1800 \times 1.2^3}{1.0} = 23.02 \text{ cm}^4$$

⇒ Selection: Use a heavy duty extrusion MA1-1 where $I = 29.37 \text{ cm}^4$

Load case 2

$$f [\text{mm}] = \frac{0.0074 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

All calculation examples are based on clamped condition.

Load case 3

$$f [\text{mm}] = \frac{0.476 \times F [\text{N}] \times a^3 [\text{m}] \times b^3 [\text{m}]}{I [\text{cm}^4] \times L^3 [\text{m}]}$$

Example:

A cross-beam measuring 2500 mm in width has to support another beam 850 mm from the end of the cross-beam. The support load is 1200 N. A 50 x 100 base extrusion is used as the cross-beam. How great is the deflection at the point where the beam is placed?

$$\text{Deflection } f = \frac{0.476 \times 1200 \times 1.65^3 \times 0.85^3}{149.84 \times 2.5^3} = 0.67 \text{ mm}$$

Where:

F = load in N
 L = extrusion length in m
 I = moment of inertia in cm⁴
 f = deflection in mm
 a/b = distance to the load point in m
 q = line load in N/m

$$a > b \quad f_m [\text{mm}] = \frac{0.952 \times F [\text{N}] \times a^3 [\text{m}] \times b^3 [\text{m}]}{I [\text{cm}^4] \times L^2 [\text{m}]} \left(\frac{L [\text{m}]}{L [\text{m}] + 2a [\text{m}]} \right)^2$$

$$a < b \quad f_m [\text{mm}] = \frac{0.952 \times F [\text{N}] \times a^3 [\text{m}] \times b^3 [\text{m}]}{I [\text{cm}^4] \times L^2 [\text{m}]} \left(\frac{L [\text{m}]}{L [\text{m}] + 2b [\text{m}]} \right)^2$$

Load case 4

$$f [\text{mm}] = \frac{0.0037 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

$$F = q \times L$$

Example:

A measuring plate (whose intrinsic stability is ignored) may not bend by more than 0.4 mm. The measuring table is 1500 mm deep and the line load on each side of the table is 8000 N/m. Which extrusion must be used to support the measurement plate?

$$F = q \times L = 8000 \times 1.5 = 12000 \text{ N}$$

$$\text{Deflection } f = \frac{0.0037 \times F \times L^3}{I} \Rightarrow I = \frac{0.0037 \times F \times L^3}{f}$$

$$\text{Moment of inertia } I = \frac{0.0037 \times 12000 \times 1.5^3}{0.4} = 374.64 \text{ cm}^4$$

⇒ Selection: Use a heavy duty extrusion MA1-5 (100 x 100) where $I = 380.00 \text{ cm}^4$

All calculation examples are based on clamped condition.

Extrusion machining information

Ordering overview Extrusion machining codes

The order number is made up of the type of extrusion, with the machining code for each end and the length of the extrusion. The available codes for the machining are listed on the following chart. The code covers the most standard machining.

Special machinings are indicated with the order code «-99». In this case, a customer drawing is requested!

An item number is made up of the following:

- ① Select the appropriate design or special extrusion (extrusion type)
- ② Define the machining on the left side of the extrusion according to the following overview if the left side of the extrusion is to be left unmachined: Code -02
- ③ Define the machining on the right side of the extrusion according to the following overview if the right side of the extrusion is to be left unmachined: Code -02
- ④ Indicate the required extrusion length in mm/L

Order number with standard machining

Order number with additional special machining, the order code also indicates -99

Example: C01-1 - 11 - 13 - 99 / 200

Special machining:

- ⑤ -99

Extrusion machining information

Application

The drill jig and special drill bits make it easy to drill the holes for KANYA's patented PVS® connector. The main advantage of the drill jig is that it clamps directly onto the extrusion. The rotating stop, for square or mitred cuts, guarantees the precise drilling distance.

The HSS special drill bit, with the MT2 Morse taper shank, is ground flat to cut the extrusion surface. It can be re-sharpened as often as necessary.

A special drill bit with a 90° point is used to drill the C03-8, B01-8 softline extrusion and the A02-8 and C02-8 angle extrusions.

Standard 90° joint "25" stop

Mitre joint "32" stop

That drill, allows a connection for a parallel connector at any position at the extrusion.

Machining data

Extrusion type	D	Ø	A	T
50 base	18.1	13.7	32	33
45 base	18.1	13.7	32	30.5
40 base	18.1	13.7	32	28
30 base	15.1	12.1	32	21.5
20x50, 20x100 base	15.1		32	18
20 base*	7.3		25	

* with a centre hole ø 6mm

Note

The 7.3 mm Ø holes for 20x20/40 extrusions are drilled using a normal twist drill bit without a drill jig.

Four sided softline extrusion 50x50 type A10-0

Application

The 50 series Softline extrusion is used to create stable, attractive and easily washable constructions. Ideal for clean room applications. Due to the small curved corners, there are no dirt grooves with a T-connection. A very decorative extrusion which offers the designer many application possibilities whilst at the same time also being lightweight and inexpensive.

50x50 face extrusion	
Standard length 5000 mm	A01-8-5M
50x50 face extrusion	
Cut to length	A01-8-02-02/...

Application

Corner and face extrusions are used in any applications where closed surfaces are required. The advantages of these are that they improve the appearance of the structures and also minimise the build up of dirt. Extrusions can be fitted onto the closed faces by drilling holes in the outer face of the extrusion at the required points and using AC32-... type threaded plates. The small lugs inside the extrusion guide the plates.

50x50 face extrusion with rip off panel slots type A03-8

* Rip off slot

Application

The one face closed extrusion gives the possibility to open a slot to insert a panel, ideal for delicate solar-panels. Rip off the slot, if necessary put in a sealing strip, insert panels and mount the frame. The 8 mm panels fit perfectly in the rip off slot.

Technical data

Extra machining	Pages 43-47

Application

An extrusion which boasts all the advantages of the comparable A01-2 and MA1-2. In addition, its large inner cavity can be used to channel air, gas, water, oil, etc. The driving belt on a twin-belt conveyor can also be fed back in this chamber. The sealed face keeps dirt out. The extrusion can be extended using the closed threaded-plate slots. Simply drill a hole, place a threaded plate behind the hole and carry on building!

Radius extrusion 100x100 Type A03-9

Application

There is a core hole at the front of the extrusion, which allows easy mounting of an adjustable foot. A cover can be provided by a lasered aluminium plate, This is screwed on by means of a threaded reducing sleeve.

Extra machining	Pages 43-47

Application

Corner extrusions are always used when closed surfaces are required. Particularly with larger machine casings, this extrusion is frequently used as a corner pillar that can absorb weight at the same time, but also optimises the look of the machine. With a base plate (A47-80) a central adjustable foot can also be installed.

100x200 heavy duty extrusion type MA1-9

Application

Ideal for building gantries in which the supports are spaced well apart or for any application where very heavy loads have to be borne with minimal bending.

Four sided softline extrusion 80x80 type C10-4

* Rip off slot

Application

This lightweight, fully closed extrusion with a dimension 80x80, together with the 40x40 and 40x80 of the softline range of extrusions, is used in clean-room applications and for aesthetic applications where no slots are desired. The slots can be easily opened thanks to the predetermined breaking point. The proven Kanya connection technology can be easily used. Closing slots afterwards is inefficient and expensive! Partial opening of slots does not pose a problem, thereby allowing panels to be inserted into the slots of constructions.

Base extrusion 30x50 type B01-9

Application

Used for all types of structures, base frames, trolleys, conveyor belts, etc. Universally used, easy to use in conjunction with extrusions with bases of 30, 40, 45 or 50. This extrusion is sturdy and strong, despite using little aluminium.

Technical data

20x20 base extrusion type D01-5

20x20 corner extrusion type D01-3

20x20 face extrusion type D01-8

Application
Due to their relatively low weight and strength this 20x20/40 range of extrusions can only be used for small loads, such as limit switches fixtures, smart work frames, small display cases, etc.

Helicoil inserts (DIN 8140) can be used for all extrusions with a core hole of Ø6. See machining code H3/H4.

The 20x20 and 20x40 extrusions are also suitable as a support or reinforcement extrusion behind panels, which is in combination with the base 30 extrusion with panel slots (see sketch).

Face extrusion 20x50 type D02-5

Application
 With this combination extrusion 20x50mm, the 20 series extrusion cross-sections can be easily connected to the 50 series ones. The large centre allows a connector of the 20 base with ø12.1 to be fitted

Application
 This 20x100mm extrusion is lightweight and nevertheless very sturdy when positioned on its edge. Used in the construction of apparatus racks if closed faces are required. Can also be used as skirting boards along passages.

Aluminium guide extrusion type B19-8

Application

This aluminium guide can be easily clipped into all slots of Base 50/45/40/30. With 30 base extrusions, a snap-in function prevents the guide from falling out. With 50/40 base extrusions, the guide is jammed in the slot. If necessary, a steel pin Ø 6 can also be pressed in on the side which prevents any possible movement of the guide. Advantages of this guide are:

- Quick and easy fitting, and inexpensive
- Closed slots reduce the build up of dirt
- Can be retrofitted at any time onto existing structures

Sliding doors are so easy and inexpensive to produce. Used especially in applications where the build up of dirt in an open slot or guide is to be prevented.

This extrusion is primarily used as a running rail for the concave roller.

Wheeled runner, see [Page 170](#).

Angle extrusion raw 70x70	
Cut to length	C30-3-02-02/...

Angle extrusion type E30-3

Application

This angle extrusion is the starting material for mounting brackets for the base 45 products. The support arch with the Kanya shadow slots appears very elegant.

Technical data

Cross-section area	=	13.44 cm ²
Weight	=	3.70 kg/m

Rectangular tube

Application

With the rectangular tube and with the combination of the extrusions base 50, 45, 40 und 30 a telescope function can be easily created. Can also be used as a guidance for a counter balance in a construction with a lift gate in addition to many «classic» rectangular tube applications.

Counterweight extrusion 50x100 type A19-2

Application

Counterweights can be inserted into this extrusion for vertical sliding doors. This is a combination extrusion of base 40 + 50. The slots are based on the geometry of base 40 which is why base 40 accessories are the most suitable to use. This extrusion can be connected to the PVS® Direct ([page 145](#)).

Kanya connection technology

The extrusion connection system PVS® opens up new possibilities for all structural design problems, whether for machinery, transfer and handling systems, guards, machine enclosures, work benches, laboratory facilities, cabinets, room partitions or exhibition stands. Rectangular, round, square or diagonal, fixed or swivelling: Kanya is the perfect solution.

Quick, secure connections:

Kanya PVS® makes it possible to erect any structure in a very short time. The system centers around Kanya's own invention, the internationally patented PVS® connector. Any extrusions can be joined together securely.

Simple and versatile assembly:

The two fundamentals which allow you to build a structure to your own design are ease of assembly and a comprehensive range of extrusions and accessories. Modifications or additions can be easily made, when the need arises, without wasting any material.

Highly cost-effective:

Any part can be customised. There is no need for expensive finishing or surface treatments. Expensive construction is minimised, saving time and reducing costs. All the parts can be reused repeatedly since all joints are simple to dismantle. That's what makes this system the most cost effective you can buy in the long run.

An example of making a simple 90° connection.

All the Kanya PVS® connections work on this simple principle, regardless of direction or size.

1. Insert the barrel into the hole made in the second extrusion.

2. Insert the sprung anchor into the centre hole of the barrel.

3. Push the anchor head into the slot of the first extrusion; twist 90°. Tighten the Allen screw. That's all.

Connection technology

Video connection technology

PVS® connectors - overview

1. Universal connections

The round anchor head allows the extrusions to be set in any position, however it must first be pushed into the retaining slot. **Also available in stainless steel or providing electrical bonding. (electrically conducting)**

2. Standard connections

The milled anchor heads allow extrusions to be added subsequently. Horizontally and vertically milled anchor types are required to guarantee that every extrusion position is possible. **Also available in stainless steel or providing electrical bonding. (electrically conducting)**

3. Combination connections

To provide the optimum connection for all cross-sections, the combination connectors are used in a similar way to the standard connection.

4. Special connections

The special anchor, which is available in different lengths, makes parallel and cross connections possible.

5. Mitred connections

The formed anchor head – 15°, 30° and 45° in both left and right designs – or with an articulated head to create connections at virtually any angle

6. Double mitred connections

The anchor which can be swivelled from 0° – 90° can be used universally and creates a sturdy frame with slots all around.

7. Extrusion extensions

The rigid anchor guarantees an extremely stable extrusion extension

8. Threaded connections

The threaded anchor (M6 / M8) enables the extrusion to be attached to other structures. And the erection of a machine safety guard on an existing work top without any additional fixings.

Covering cap for PVS-connector

Application

The covering cap for the PVS-connectors have two functions: aesthetics and protection. With the connector on a face side of an extrusion, it covers the visible part of the connector.

If the application is in a dirty environment, it is wise to protect the screws from dirt to allow functionality.

PVS® screw «Safe»

Special PVS® screw Safe M12x12 for safety constructions which must not be easy to dismantle by unauthorised persons. A pin inhibits access to the screw so that it cannot be unscrewed using a commercially available Allen key.

Order data	Order number
PVS® screw Safe	125-80-S

Strength specifications

That chart shows the shearing forces in relation to torque and number of connectors of the most important extrusion combinations.

At a torque of 30Nm lies the shearing force for a connection with one connector at approximately 4000N.

Recommended torque: for the universal and standard connectors:

Extrusion base 50/45/40: 30–35Nm

Extrusion base 30/20: 20–25Nm

Extrusion base 20 (Ø6): max. 6Nm
(other connectors on request)

Remark:

The tightening torques should not exceed above mentioned recommended specifications:

⇒ The anchor head may be damaged or broken.

Those in the chart stated tractive forces are approximate value. Conditions: Preload of connectors with max. tightening torques!

Base 30	3'500N
Base 20	1'800N

Pull-out force nuts*

Base 50 / 45 / 40	8'000N
Base 30	3'000N
Base 20	1'500N

*Swivel in nut

The tear-out force depends basically on the nut geometry, as the weakest point is the aluminium nut. Pay attention to the nut thickness.

Base 30

Connectors of different profile sizes on request

Application

The extrusion does not need to be machined for this connection. This selfcutting threaded sleeve has a shank for an Allen key which is simply used to screw it into the longitudinal slot. The screw is mounted into the threaded sleeve in advance, thereby connecting the extrusion to the extrusion nuts in the counter extrusion. These can be installed afterwards. This stable connection, assembly is slightly more complex than with the PVS® standard connector. The prerequisite for this connection is access on both sides to the slots.

Note

The side slots are blocked by the connection. Panels would therefore have to be machined the site of the fasteners.

Selfcutting threaded sleeve

Built-in connector

Due to the direct transmission of force, the PVS®-direct connector is slightly higher in strength on thrust than our main connector. However, under moment loads, the groove can bend open. The base 30 is not optimally suited in terms of groove depth, as the thread insert protrudes slightly from the groove.

Parts supplied

- 2 screws
- 2 threaded sleeves
- 1 double extrusion nuts (Base 30: 2 swivel in nuts)

Order data	Order number
Base 50	A33-90
Base 45	E33-90
Base 40	C33-90
Base 30	B33-90

The Kanya connection technology

PVS®-SUPERLIGHT

1. Insert the self-cutting threaded insert into the extrusion centre hole.

2. Drill a stepped hole into the extrusion.

3. Tighten the socket-head cap screw – finished!

Note:

Instead of a stepped hole, you can also just drill a simple hole for the allen key and then insert a round-head screw into the counter slot.

Cable bridge for electrical conductivity

Application

If extrusions have to be electrically connected with other components, e.g. ESD, these connections can be realized with simple components.

We recommend the connectors with potential equalization (-P) for Kanya extrusions.

Parts supplied

- 1 Swiveled extrusion nut (2)
- 2 grub screws with point (2x)
- 3 washers (2x)
- 4 cables with cable lug (1mm²) approx. 100mm (1x)
- 5 swiveling cap nuts (2x)

Order data	Order number

Base 30	B36-00
Base 40	C36-00
Base 45/50	AE36-00

Allen key

Allen key set SW 1.5 – 10

Application
For all screw-in parts with hex key.

The ball-shaped ends allows it to screw into angular positions with the allen key. This is necessary for the function of the new patent PVS®-EASY connector.

Kanya Allen key SW 6

Specification
Zinc-coated steel

Allen key for PVS® screw Safe

Application
Special Allen key for the PVS® connectors with PVS® screw Safe M12x12.

Uniblock

Application
The uniblock is used to secure all sorts of panels in place. The uniblock can be attached to the extrusion without having to use any screws thanks to the attached anchor-head. The panel is then screwed to the uniblock. The captive square nut provides a large tolerance range. Different spacers can be used to give the required gap between the panel and the edge of the extrusion.

Specification
PA-GF, black, square nut, zinc-coated steel

Clamping block

Application
The clamping block can be used to mount panels to extrusions without any additional fixings. The panel is clamped in the block by means of a toothed slide, simply and without having to use a tool. Spacers can also be used in the clamping block to give the required gap between the panel and the edge of the extrusion.

Specification
PA6-GF30, black*

Attachment bracket

Application

The fixing angle is used to mount additional equipment, panelling, work tops, valves, electrical switchgear, etc. The advantage of these is that they are slotted on one side, allowing fine adjustment.

Specification

Aluminium, matt, anodised in natural colours

T-bolts

Application

T-bolts are used to fasten all types of components and are simple to insert, even after assembly. The anti-twist shape is a help during assembly.

Specification

8.8 steel, zinc-coated

Scope of delivery

Screw, hexagonal nut, washer

Swivel in nut

Extrusion base 50/45/30

Extrusion base 40

Measurement data

Extrusion base	B	H	L
50/45	14	7.8	20
40	12.5	5.9	22
30	11	4.1	20

Application

The advantage of the swivel in nut is that they can also be inserted diagonally into the extrusion slots. The disadvantage is that the tightening torques >12 Nm may result in dents in the aluminium extrusion. Raw steel bars are available if you wish to machine special nuts.

If these nuts are tightened to a torque > 10Nm, they meet the ESD guidelines for use with lightweight extrusions.

Magnet nuts

Application

The magnetnuts can be inserted into the extrusions of the base 50 and 40 on the open cross section. They can be fixed on position with 2 small screws. With the magnet-nuts you can do a flat door fixing, fixing of metal housing or use it for holding tools.

Specification

Surround: plastic
Screws: zinc-plated
Magnet: zinc-plated
Operating temperature: up to 80 ° C

Order data **Order number**

Magnet nuts	
Extrusion base 50	A32-86
Extrusion base 40	C32-86

End caps

Application

End caps are used as covers for the exposed ends of extrusions. They prevent injury from the sharp edges of the extrusions. Special centring elements make them easy to fix and prevent the caps from twisting. Two end caps can be used together to cap off larger extrusions, eg extrusion 80x120 uses two 40x120 end caps.

Specification

Self-cutting threaded insert

Expanding sleeve

Anti-twist spigots

Levelling feet

Levelling feet

Application
The self-cutting threaded insert has the advantage that no machining is required in order to attach elements on the face. Connections subject to tensile stress are primarily only ideal. This means that attaching levelling feet or casters is not recommended.

Note that there is no thread around * the hexagon socket.

Specification
Zinc-coated steel

Application
The expanding sleeve is used to create a thread in the centre hole of the cross section. Hammering it in and clamping it with the expansion screw in the cross-section results an M8x15mm.

Tightening torques
Expanding screw:
min. 10Nm, max. 12Nm

Specification
Zinc-coated steel

Parts supplied
Expanding sleeve, expanding screw

Application
For all extrusions which are assembled with a PVS® connector and which must not twist. The spigot can also be fitted to existing extrusions (does not apply to 20x20 extrusions).

Specification
Zinc-coated steel

Parts supplied
Spigot, adjusting screw

Levelling feet with shock absorbers

Application
The aluminium levelling foot is available with a special shock absorber insert. This ensures that vibrating structures sit securely on the floor.

Specification
Cup: aluminium
Roundel: \varnothing 80x18
Multi-layer, non-slip, vibration-absorbent, composite structure.
Bolt: 8.8 steel, zinc-coated

Example: A80-20-S

Other dimensions on demand.

Floor bolting bracket

Application
A floor bolting bracket is used when a system has been aligned and has to be bolted to the floor. It is very easy to use because its height can be adjusted in the extrusion slot and the bracket can be easily secured to the floor using anchor bolts.

Specification
Aluminium, anodised in natural colours

Fixing kit*
2 screws, 2 threaded plates, 2 washers

Order data	Order number		
Extrusion base	B	\varnothing	
50/45/40	40	8.5	A47-00*

* Fixing kit: add -S to the order number
Example: A47-00-S

Gusset plate

Application
With the gusset plate you create a reinforced connection of 2 extrusions. The punched beads position the extrusion. In the middle hole swivel castors can be mounted offset inwards.

Specification
steel, blue galvanised

suitable for base 40/45/50

Order data	Order number
Gusset plate 100x100x4	C30-50

Double bolting bracket

Application
An advance on the normal floor bolting bracket, with the added advantage that it can be used together with large levelling feet (Ø 90). The double bolting bracket also secures the supporting extrusions in two directions.

Specification
Steel, powder-coated in black

Order data	Order number
Double bolting bracket	A47-20(-S)*

Single bolting bracket

Application
For easy fixing to the floor. As with the double bolting bracket, this single bolting bracket can be combined with a levelling foot.

Specification
Steel, powder-coated in black

Fixing kit*
2 screws
2 (3) threaded plates
2 washers

*Fixing kit: add -S to the order number

Order data	Order number
Single bolting bracket	A47-21(-S)*

Single bolting bracket reinforced

Application
Same as the aluminium floor bolting bracket with the added advantage that it can be used together with large levelling feet Ø90.

Specification
Steel, powder-coated in black

Order data	Order number
Single bolting bracket	A47-22(-S)*

Ground anchoring bracket

Application
The ground anchoring bracket enables simple floor mounting of 40x40 and 40x80 aluminium extrusion including levelling option.

Specification
Steel, grey powder-coated

Fixing kit*
2 T-bolts
1 levelling screw M10x60
1 threaded insert A33-20

*Fixing kit: add -S to the order number

Order data	Order number
Ground anchoring bracket	C47-31(-S)*

Leg bolt-down socket

Application

The bolt-down socket is used in applications where the legs have to be very firmly secured to the ground. The extrusion can be adjusted easily within the guide socket and can be secured in place using the fixing kit included. The bolt-down socket should be chosen, from the three available, to suit the space available.

Specification

Steel, powder-coated in black

Fixing kit* (applies to all types)

8 cylinder screws, 8 threaded plates
8 washers

Fixing kit* (applies to all types)

4 cylinder screws, 4 threaded plates,
4 washers

Castors

Non-swivel castors

Application

Can be used in any application where mobility is required. There are four diameters of wheels available (with or without locks) depending on the load capacity required. Swivel and non-swivel castors have the same load capacity. (F)

The castors can be simply attached to the extrusions either with an M10 bolt or by means of an M16 / 14x25 threaded stud. Range of application -17° to +60°C

Specification

Fork: Zinc-coated steel,
Ball bearing
Wheel: Rubber tyre 87° Shore,
Ball bearing
with «fender» made of POM light gray

For load of >800N we recommend castors with PO-wheels.

Castors with PO-Wheels and other sizes, heavy duty and anti-static castors are available on request.

* PO wheels

*incl. washer of 2 mm

Load data F for non-swivel castor:
ø75 = 750N
ø100 = 1000N
ø125 = 1000N

Casters with backplate

Application

These casters with backplate can be screwed directly into the extrusion slot. Can even be used on workstations or storage racks, any application where mobility is required.

Specification

Fork: zinc-coated steel, ball bearing
 Wheel: PO, ball bearing

Rollers

Application

This roller is suitable for heavy sliding doors, as a wheel for workpiece holders or for general structures which have to move freely. Insert the guide flange into the extrusion slot. Fit the flat roller onto the other side. This creates the perfect trolley/rail combination independent of the extrusion tolerance.

Specification

Plastic roller, ball bearing mounted, steel spacer, gunmetal finish
 Radial load
 F = 500 N

	Order data		Order number	
	Centric	Eccentric	C48-00	C48-01
Roller with guide flange			C48-00	C48-01
Roller without guide flange			C48-10	C48-11

Application

This ball bearing-mounted roller is mainly used in an assembly with the trolley extrusion, although it can also be attached directly to any extrusion.

Specification

PA 6 black
 2 deep groove ball bearings with cover disks
 F = 150 N

Order data	Order number
Roller PA	B48-05

Concave roller

Application

This ball bearing-mounted roller is mainly used in an assembly with the trolley extrusion. It can however also be attached directly to any extrusion. The corresponding aluminium guide extrusion type B19-8 is used to produce an inexpensive roller guide in next to no time.

Specification

Plastic PA 6 black
 2 deep groove ball bearings with cover disks
 F = 150 N

Order data	Order number
Roller, concave	B48-10

Concave double-wheeled trolley

Double-wheeled trolley

Application

A wide range of different applications is possible with the double-wheeled trolley. It provides a simple and mechanically reliable way of creating equipment chassis, sliding doors, lifting devices etc. Any lengths of extrusion can be used. However, the spaces between rollers should not exceed 1000 mm for large trolleys. Trolleys are also available with more than 2 rollers.

Using the concave rollers, together with the aluminium extrusion guide B19-8 on page 122, it is easy to produce easy cleaning guides.

Parts supplied

Aluminium extrusion with ≥ 2 rollers.
PVS® connector and/or cover caps fitted.

End of trolley (page 169) with PVS® connector

Plastic slide extrusion
Standard length 5000 mm
Cut to length

Plastic slide extrusion
Standard length 5000 mm
Cut to length

Application

Ideal for any shape of slide guide, for instance for sliding doors or drawer runners. Simply push the slide extrusion into the aluminium extrusion slots – you can create a perfect, hard-wearing guide as easily as that.

Make the inner frame 5 mm smaller than the inner width of the outer frame. It is also ideal for static extrusion assemblies.

Cable ducts

Holes only in slotted model

Application

The cable ducts are placed directly onto the extrusions and are secured using either the retaining clips or extrusion nuts available. The duct is easy to open or close any time as it is fitted with a press-on cover. The slotted sides enable cables to be fed in and out at any point.

Specification

PET-G

Application

This transparent panel is food-safe and can be used in clean-room applications and medical technology. Metal machining and cold or hot forming is possible

Specification for Pet-G

impact-resistant, oil-resistant, food-safe

Colour: clear as glass, transparent
 Thicknesses: 3, 4, 5, 6, 8 mm
 Size: max. 2000 x 3000 mm
 Weight: 3 mm: 4.14 kg/m²
 4 mm: 5.52 kg/m²
 5 mm: 6.90 kg/m²
 6 mm: 8.28 kg/m²
 8 mm: 11.0 kg/m²

Order data	Order number
PET-G plate 3 mm	A50-73 A x B
PET-G plate 4 mm	A50-74 A x B
PET-G plate 5 mm	A50-75 A x B
PET-G plate 6 mm	A50-76 A x B
PET-G plate 8 mm	A50-78 A x B

Other plastic plates available on request

PVC foam plates

Application

For enclosures or as shelves for light elements. Metal machining and cold or hot forming is possible. The plastic plates are placed directly in the extrusion slots or mounted using fixing elements such as brackets, Uniblocks or quick-release fasteners.

Specification

PVC foamed
 scratch-proof and impact-resistant
 oil-resistant
 highly fire-retardant according to DIN 4102 (self-extinguishing)

Colour: white
 Thickness: 3, 4, 6, 8 mm
 Size: max. 2000 x 3000 mm
 Weight: 3 mm: 2.1 kg/m²
 4 mm: 2.8 kg/m²
 6 mm: 4.2 kg/m²
 8 mm: 5.6 kg/m²

Other colours may be supplied on request.

Aluminium sheets

Application

All types of enclosures.

Specification

Al-sheet 2 and 3.0 mm
 Anodised in a natural colour, one side with a protective sheet
 Maximum size: 1000 x 2000mm
 Other dimensions or powder coated sheets are available on request
 Weight: Al 2 mm: 5.4 kg/m²
 Al 3 mm: 8.1 kg/m²

Order data	Order number
Aluminium sheet, 2 mm	A53-20 A x B
Aluminium sheet, 3 mm	A53-30 A x B

Expanded metal

Application

The panel for designers with taste – light and attractive, but nonetheless sturdy. Can be used for virtually any purpose.

Specification

Aluminium 2 mm, raw
 Maximum size: 1000 x 2000 mm
 Weight: 2.0 kg/m²

Order data	Order number
Expanded metal	A54-20 A x B

Perforated sheet

Application

The perforated aluminium sheet as a housing surface for ventilated areas. Where heat accumulation can occur, e.g. from a motor or other electronic components. This anodised sheet is also an aesthetic surface element.

Specification

Size of hole 8 mm with 11 mm grid in 60° placement.
 Weight: 2.85 kg/m²
 Size: 952 x 2000 mm
 Surface: bright rolled

Order data	Order number
Perforated sheet, 2 mm	A54-40

Steel wire mesh

Application with U-Clamping extrusion B19-6

Application with wedge extrusion C39-45

Application with grid extrusion C39-70

Application

Safety guards, store partitions, restricted access, etc.

This wire mesh can be inserted directly into the 8mm slot on the extrusion together with the surround extrusion C39-70 and the clamping extrusions B19-6.

Specification

Zinc-coated steel

Mesh width: 40 mm

Wire thickness: 4 mm

Size: max. 1000 x 2000 mm (1250 x 2500)

Weight: 4.5 kg/m²

L = 1000 mm		A39-16
L = 2000 mm	A39-17	A39-18

Aluminium sealing extrusion 50/40/30

Application

The grooves of the construction profiles are undoubtedly very practical. With certain constructions, however, they disrupt the appearance and attract dirt. The cover profiles made of aluminium facilitate a closed appearance despite maximum flexibility offered by the open grooves. Dirt can thus no longer be deposited either.

Specification

Aluminium anodised

Measurement data

H-strip

Application
Used in combination with the B39–55 channel reducing strip, this H-strip allows lift-on or lift-off panels to be inserted or removed.

Bottom: B39–35
Top: B39–55

Specification
Grey PVC for panels of 4 or 6 mm in thickness

Order data	Order number
H-strip Standard length 5000 mm Cut to length	extrusions B05-1 B39-35-5M B39-35-02-02/...

Wedge extrusion

Application
The wedge extrusion can be pressed into the slot on extrusions with a base of 40, 45 and 50 mm. The force holds the panels tightly in place, however thick they are.

Specification
Suitable for panel thickness of 2–3.5 mm
Grey PVC

Order data	Order number
Wedge extrusion Standard length 5000 mm Cut to length	C39-45-5M C39-45-02-02/...

Door stop profile

Application

As the name says, this profile is used as a door stop. The foot geometry means that it can be clipped into the basis 40. The soft sealing lip muffles firstly the closing and facilitates a certain tightness. It should be ensured that the door gap is of a correspondingly large size.

Specification

Hard (soft) PVC, grey

Matching extrusion combinations:

	Frame	Door
Base	40	40
Base	50	45

Grid extrusion

Application
Mainly used for holding steel-wire-mesh. The soft lips insulate the vibration and compensates the different thicknesses. It's qualified for panels with 2-4 mm thickness. The grid extrusion fits into the base 50, 45 and 40.

Specification
Hard- (soft) PVC, black
Installation depth for panels: 8 mm

Order data	Order number
------------	--------------

Grid extrusion
Standard length 5000 mm C39-70-5M
Cut to length C39-70-02-02/...

Clamping sealing strip Base 30/20

Application

This sealing strip is used to stabilise and seal panels in the extrusion cross-sections of base 20 and 30. It is fitted after the panels are inserted.

Specification

TPE black, oil-resistant
For panels 5–6 mm thick

Clamping rubber seal

Application

These profiles are used for the installation of panels in the profile groove. The installation is done after the panels have been inserted. The rubber profiles can simply be pressed into the existing gap. The material automatically results in a damping, sealing and stabilising effect.

Specification

Neoprene rubber black, oil resistant, contains no silicone

Joint with clamping lever	A	L	
Base 50	50	85	A61-01
Base 40	40	65	C61-01

Joint base 30

Application

The joints of the basis 30 are fundamentally used as connecting elements in which a connection crosswise to the groove can be generated. At the front, the joint is screwed with a thread insert. The connection laterally to a profile is done with a threaded plate and the matching screw. The variant without clamp lever is clamped when the screw is tightened. The joint is not designed for permanent movement.

Specification

Aluminium, matted, natural coloured anodised

Parts supplied

- 2 joint halves loose
- 1x fixation material S1, S2 or S3 pursuant to situation 1 / 2 / 3
- 1 distance busing
- 1 counter sunk screw M6x30

Assembly situation

Fixation sets supplement product number with -S1, -S2 or -S3.
For example: B61-00-S1

Order data	Order number	
Joint base 30	B61-00	

Joint base 30 with clamp lever

Application

The joint with clamp lever serves to create pivotable constructions easily. It is important here that the joint does not have to absorb strength against the course of the thread as it can otherwise become loose.

Specification

Aluminium, matted, natural coloured anodised

Parts supplied

- 2 joint halves loose
- 1x fixation material pursuant to situation 1 / 2 / 3
- 1 clamp lever M6

Order data	Order number	
Joint base 30 with clamp lever	B61-01	

Corner pieces

Attachment

All corner pieces can be mounted using three threaded connectors for the respective extrusion sizes. These can be found on [page 140](#) or simply order a fixing kit. The order number of the fixing kit consists of the respective item number of the corner piece to which -S is added.

Corner piece fixing kit 3 threaded connectors

Application

Gives an attractive finish to the corners of display cases, work benches, office furniture, cabinets and other well designed structures. Available rounded or diagonally cut.

Fixing kit*

3 PVS connectors with thread

Specification

Aluminium, anodised in natural colours
Attached by a PVS threaded connector

Tube handle offset

Application

These strong tubing grasps are suitable for heavy sliding doors, large windows or also as impact handles for trolleys.

With double sliding doors and critical space conditions, anywhere that risk of trapping hands exists, the offset tubing grasp is highly recommended.

Specification

Support: PA-GF, black

Recessed grip

Recessed grip

Application

A recessed grip made of plastic that is sufficiently large for a hand wearing a glove to be inserted. Or you use this as a storage recess for small parts. Simple fixation by means of screws/rivets.

Specification

PA-GF black mat and grey

Order data	Order number
Recessed grip	A65-50

Order data	Order number			
Thickness:	2mm	3mm	4mm	5mm
Grip recess, black	A65-32	A65-33	A65-34	A65-35
Grip recess, light-grey	A65-42	A65-43	A65-44	A65-45

Recessed grip with clip function

These recessed grip are suitable for sliding doors as well as for light swing doors. With the clip function, installation is very easy.

Specification

ABS plastics

Recessed grip screwable

This recessed grip is suitable for sliding or swing doors. The fingers find enough space in the bowl for a good grip. For transparent panel elements, we recommend the retractable recessed grip.

Specification

ABS plastics

Fixing kit

- 1x front side
- 1x finger protection (back side)
- 2x lenshead, screws ø3x18, galvanized steel

Thickness A: 0.5 – 5mm
Colour: black

Order data	Order number
Recessed grip, screwable	A65-55

Ball catches

Rod lock

Application

The rod lock is installed inside 50, 45, 40 and 30 mm base extrusions. The extrusions have to be milled in the area of the handle. It has a double rod locking mechanism. The rod is cut to the appropriate installation length.

Specification

Handle: grey (RAL 7015)
Rod: zinc-coated steel

max. length per rod:
base 50/45/40 max. 1500mm
base 30 max. 1100mm

Parts supplied

- 1 handle with 2 rod adapters
- 2 rods
- 2 plain bearing bushes
- 2 guide bushings
- 2 countersunk screws M5 and 2 threaded plates

* Base 30: Ø12

Snap-lock

Application

The snap-lock comprises a door housing with a latch as well as a framework housing. Its versatile design allows the lock to be used for different widths of extrusion. Another advantage is that it is very easy to open and close.

Specification

GD-Zn, black
instant locking, 2 keys
4 M6 square nuts

Order data	Order number
Snap-lock	A68-51

Safety switches

Application

Safety switches are mandatory in many applications. If required by the customer, we will provide and set up the mechanical assembly. Simply send us the switch and we will integrate it in the structure.

Depending on the potential risk, the switches must fulfill various functions, e.g.:

- mechanical locking without power
- signal when door closed
- enabling/disabling of automatic processes

Locking handle

Application

Lockable machine doors, such as switch cabinets, service doors or easy access points, are often made with the industry standard locking handle. We also integrate these into our designs.

Sealing plates

Application
To seal the cut ends of manifold extrusions. Air, water, oil or other media can be supplied or drained off with the appropriate gas fittings.

Fixing kit*
Screws + threaded inserts

Specification
Al, anodised in natural colours

Shaft clamping block

Shaft clamping block - straight

Shaft clamping block - 90°

Application
A high-precision linear bearing system can be created very easily with the components, i.e. the shaft clamping block, the linear bearing block and the steel shaft. As there are two different shaft clamping blocks, the system can be assembled flexibly. The fixing centres combine well with the PVS® extrusions.

Specification
Aluminium, anodised in natural colours
Scope of delivery including screws.

Order data	Order number
Shaft clamping block - straight	L16-60
Shaft clamping block - 90°	L16-65

Linear sliding block

Specification

Housing: aluminium, anodised in natural colours

Linear bearing: steel, sealed on both sides, maintenance-free

Application

The guide extrusion 40x100 is used for high load linear slides. Because of the steel shaft support on one side, the distance between the guides can be freely selected. The shaft is pressed into the designated slot. A stop can be attached to

Load ratings

Size	F _{red}	F _{ex}
20	300N	170N
30	800N	400N
45	1600N	860N

Application

Mainly for horizontal and vertical guides, in particular for drawer runners subjected to heavy loads, lifting and sliding doors as well as height adjustable work benches, or any application where larger loads need to be moved back and forth.

Specification

Stainless steel

Other slide dimensions available on request.

Order data

Order data	Order number
Slide including rollers	
Size 20	L20-20
Size 30	L30-20
Size 45	L45-20

Technical data

Temperature range:
-20°C to max. +100° C max.
Displacement speed: 1.5 m/s

The flat slide means the design is compact. It is screwed directly onto the structure extrusions. Two anti-twist spigots position the slide parallel to the extrusion.

Both outer rollers support the load. Markings show the contact side to the guide rail. The middle roller can be set to the desired preload using the excentric screw.

Roller system

Application

The roller tracks, together with special clamps, are simply mounted to the Kanya 50, 40 and 30 base aluminium extrusions.

The roller track system can be used for all types of conveyance and removal of material and goods. Examples of typical applications

- Roller transport via gravity for all types of boxes
- Roller transport connections between workstations
- Roller conveyance to work benches
- Material roller transport within a machine production plant
- Accurate positioning of boxes

The range includes rollers with and without guide flange. All roller tracks are also available as ESD version.

Technical description

Roller tracks are made from bent steel sheets, galvanised, 0.8mm, width 36mm, overall height 36mm
 Axes made from zinc-coated steel, diameter 3mm
 Bore holes with diameter 4.1mm at the base of the roller track
 Vertical load up to 40 kg per roller (lying on flat surface)

Roller tracks

Product advantages

The special shape of the steel sheet allows the roller track to close when under load. This significantly increases the resistance against twisting or bending.

Loads

The roller tracks (one pair) can be subjected to loads as follows, according to the length – see table below.

Clamping for easy fixing of roller tracks to extrusions and tubes.

Roller tracks, flat

Application

These roller tracks are ideal for use with storage and transportation racks. For lightweight transport of items, this self-supporting rail can be used for up to 3m. For packaging tables, assembly workstations and devices in process operations, these simplify the transport of goods and logistics.

Specification

Steel rail
 Plastic rollers with steel axes

Technical description

Distance between roller axes is 33mm, weight: 0.86 kg/m; rollers made of polypropylene, diameter 28mm, width 24mm, ESD version with electrostatic discharge (resistance coefficient during throughput of electricity of 28.8Ω/cm²)

Rollers available in other colours on request when ordering more than 300 m.

Roller tracks with guide flange

Application

These roller tracks are ideal for use with storage and transportation racks. Light-weight transport of items is kept within the track by the side guide.

Specification

Steel rail
Plastic rollers with steel axes

Technical description

Distance between roller axes is 49.5 mm, weight: 0.9 kg/m; rollers made of polypropylene, diameter 28mm, width 25mm. ESD version with electrostatic discharge (resistance coefficient during throughput of electricity of 28.8Ω/cm²).

Rollers available in other colours on request when ordering more than 300 m.

Roller track adapter

Application

This roller track adapter can be screwed onto the 30/40/45/50 series base extrusions. The roller tracks are pushed in and attached to an extrusion structure.

Replacing or moving them is simple.

Order data	Order number

Cut to length	L80-2-ESD-02-02/...

Roller stopper

Application

This roller stopper can be used to finish off the roller tracks to make it easier to remove containers, transportation boxes or packages. The goods being transported slides onto the roller stop and comes to a standstill. The items being transported can now be removed without having to lift them.

Order data	Order number
Roller stopper	L80-30

Anti-return

Application

This element prevents the return of the item being transported. Installed in the right place, this easy-to-install element offers a great solution to the flow of material.

This product can also be used as a simple stop at the end of a roller track to prevent boxes or containers from falling off.

Order data	Order number
Anti-return	L80-31

Tube clamp system
RVS®

Extrusion tolerances – extract from EN 12020-02

1. Straightness tolerances

Cavity extrusions shall not exceed the values stated in the table for straightness tolerances h_1 . The deviation h_2 shall not exceed a maximum of 0.3 mm over any length of $l_2 = 300$ mm.

3. Angular Tolerance w

If side lengths are unequal, the angular tolerance relates to the angle of the shorter side.

Width b in mm		Inclination tolerance w in mm
over	up to	
-	30	0.3
30	50	0.4
50	80	0.5
80	100	0.6
100	120	0.7

2. Distortion Tolerance v

The distortion tolerance v for cavity extrusions subject to length is shown in the table.

4. Diameter D/D1 Tolerances

The tolerances shown in the Table below relate to the Diameter D/D1 in each case, as shown in the technical drawings.

Diameter D/D1 in mm	D Tolerance in mm		
	D	D1	D1
12	0 / +0.05	0 / -0.1	
15	0 / +0.05	0 / -0.1	
20	0 / +0.1	0 / -0.15	
30	0 / +0.1	0 / -0.2	
40	0 / +0.1	0 / -0.2	
50	0 / +0.1	0 / -0.2	

Width b in mm		Flatness Tolerance v in mm for lengths in mm		
Measurement Range		-	over 1000	over 2000
over	up to	bis 1000	up to 2000	up to 3000
-	25	1.0	1.5	1.5
25	50	1.0	1.2	1.5
50	75	1.0	1.2	1.2
75	100	1.0	1.2	1.5
100	125	1.0	1.5	1.8

Clamp Ring

Use

Normally used as a stop, or as a holder for limit switches or similar.

Nominal Diameter	Dimensions						Weight in kg	Order number
	A	A1	B	C	D	KS		
12	24	8	16	32	12	M4	-	on request
20	36	13	30	20	20	M6	0.045	R02-15
30	52	20	40	20	30	M8	0.080	R03-15
40	62	25	50	20	40	M8	0.105	R04-15
50	72	30	60	20	50	M8	0.135	R05-15

Joining Clamp

Use

To extend tubes and as a stop for large forces.

Nominal Diameter	Dimensions						Weight in kg	Order number
	A	A1	B	C	D	KS		
12	24	8	16	32	12	M4	-	on request
20	36	13	30	40	20	M6	0.085	R02-01
30	52	20	40	60	30	M8	0.225	R03-01
40	62	25	50	80	40	M8	0.395	R04-01
50	72	30	60	100	50	M8	0.625	R05-01

For diameter D tolerances, see page [230](#)

Angle Clamp

Use

Attractive corner joint for normal loads.

For reasons of stability, it is recommended that tubes in angle clamp joints are cut at 45°.

Nominal Diameter	Dimensions					KS	Weight in kg	Order number
	A	A1	B	C	D			
12	24	8	16	32	12	M4	-	on request
20	36	13	30	36	20	M6	0.060	R02-02
30	52	20	40	52	30	M8	0.150	R03-02
40	62	25	50	62	40	M8	0.225	R04-02
50	72	30	60	72	50	M8	0.320	R05-02

T Clamp

Use

Cross joints where only one tube needs to be movable.

Nominal Diameter	Dimensions					KS	Weight in kg	Order number
	A	A1	B	C	D			
12	24	8	16	32	12	M4	-	on request
20	36	13	30	45	13	M6	0.080	R02-03
30	52	20	40	65	20	M8	0.215	R03-03
40	62	25	50	85	25	M8	0.365	R04-03
50	72	30	60	105	30	M8	0.560	R05-03

For diameter D tolerances, see page [230](#)

Parallel Clamp

Use

To strengthen structures (by doubling) or to extend tubes on different levels.

Nominal Diameter	Dimensions							KS	Weight in kg	Order Number
	A	A1	B	C	C1	D	E			
12	24	8	16	42	9	12	24	M4	-	on request
20	36	13	30	66	13	20	40	M6	0.110	R02-04
30	52	20	40	100	20	30	60	M8	0.310	R03-04
40	62	25	50	130	25	40	80	M8	0.535	R04-04
50	72	30	60	160	30	50	100	M8	0.815	R05-04

Cross Clamp

Use

This is the most frequently used clamp. It can hold two freely movable tubes, offset at 90°.

Nominal Diameter	Dimensions							KS	Weight in kg	Order Number
	A	A1	B	C	C1	D	E			
12	24	8	16	38	9	12	13	M4	0.022	R01-05
20	36	13	30	58	13	20	22	M6	0.095	R02-05
30	52	20	40	84	20	30	32	M8	0.235	R03-05
40	62	25	50	104	25	40	42	M8	0.370	R04-05
50	72	30	60	124	30	50	52	M8	0.535	R05-05

For diameter D tolerances, see page [230](#)

Cross Clamp with different Ø

Use
This is the most frequently used clamp. It can hold two freely movable tubes, offset at 90°.

Nominal Diameter	Dimensions		B	C	C1	D	d	E	KS	Weight in kg	Order Number
	A	A1									
20 / 12	36	13	30	58	13	20	12	22	M6	0.102	R02-07.12

40 / 20	62	25	50	104	25	40	20	42	M8	0.420	R04-07.20
40 / 30	62	25	50	104	25	40	30	42	M8	0.400	R04-07.30
50 / 40	72	30	60	124	30	50	40	52	M8	0.585	R05-07.40

For diameter D tolerances, see page [230](#)

Cross T-Clamp

Use
Tubes can exit from this clamp in three directions, but only the same two tubes as in the Cross Clamp (page [233](#)) pass all the way through the joint.

Nominal Diameter	Dimensions		B	C	C1	D	E	KS	Weight in kg	Order Number
	A	A1								
12	24	8	16	40	9	12	13	M4	-	on request

50	72	30	60	124	30	50	50	52	61	M8	0.670	R05-14 *

* on request

For diameter D / D1 tolerances, see page 230

Horizontal Support

Use

The Horizontal Support is usually needed to close off adjustable units. However, it can also be used independently as a static or dynamic clamp.

Nominal Diameter	Dimensions												Weight		Order Number
	A	A1	B	B1	C	D	F	I	K	O	P	S	KS	in kg	
20	45	22	65	30	110	20	95	50	10	7	8	60	M6	0.360	R02-90
30	60	28	95	40	160	30	140	75	14	9	8	90	M8	0.845	R03-90
40	72	35	95	50	200	40	180	75	14	9	10	120	M8	1.390	R04-90

Other combinations on request; for diameter D tolerances, see page [230](#)

Vertical Clamp

Use

The same uses as the Horizontal Support. It can also be used as a carrier for handling equipment which needs to be rearranged simply and quickly.

Nominal Diameter	Dimensions												Weight		Order Number
	A	A1	B	B1	C	D	F	I	K	O	P	S	KS	in kg	
20	45	22	65	30	110	20	95	50	10	7	8	60	M6	0.330	R02-91
30	60	28	95	40	160	30	140	75	14	9	8	90	M6	0.760	R03-91
40	72	35	95	50	200	40	180	75	14	9	10	120	M6	1.225	R04-91

Other combinations on request; for diameter D tolerances, see page [230](#)

Universal Support

Application

Same use as the horizontal and vertical support but with the advantage that this component can be used as horizontal and vertical adjustable unit.

Nominal Diameter	Dimensions										Weight in kg	Order Number
	A	A1	B	C	D	E	O	K	S	KS		
20	36	13	30	110	20	25	6.5	10	60	M6	0.190	R02-30
30	52	20	40	160	30	50	8.5	14	90	M8	0.520	R03-30
40	62	25	50	200	40	50	8.5	14	120	M8	0.870	R04-30

Other combinations on request; for diameter D tolerances, see page [230](#)

Universal Slides

Illustration with clamp and sliding bush

Illustration without clamp

Application

Simple adjustable units can be built in modular form, in combination with various supports. The four threads are used to fix other structures in place.

Nominal Diameter	Dimensions										Weight in kg	Order Number single-sided clamp	Order Number double-sided clamp	Order Number without clamp
	A	A1	B	C	D	E	I	M	K	S

Aluminium Tubes

Can be supplied in warehouse length or cut to size.

Surface: untreated

Nominal Diameter	Dimension D1 x S	Weight kg/m	Order Number L = 5000 mm	Order Number cut to ... mm
12	12 x 1.5	0.130	R01-97-5M	R01-97-02/ ... mm
20	20 x 2	0.310	R02-97-5M	R02-97-02/ ... mm
30	30 x 2	0.480	R03-97-5M	R03-97-02/ ... mm
40	40 x 2	0.650	R04-97-5M	R04-97-02/ ... mm
50	50 x 3	1.210	R05-97-5M	R05-97-02/ ... mm

For diameter D tolerances, see page [230](#)

Threaded Inserts

For aluminium tubes.

Material: aluminium

Nominal diameter	Dimensions				Order Number
	D	D1	h	M	
20	16	20	15	M10	R14-20
30	26	30	15	M10	R14-30
40	36	40	20	M16	R14-40
50	44	50	20	M16	R14-50

Levelling feet

Application

Variable height adjustment and level compensation.

Specification

Cup: PA-GF black
Bolt/locknut: 8.8 steel, zinc-coated

Material	Levelling flange diameter	Dimension: Thread M x L	Load capacity F	Order number with 3 x Ø9	Order number without 3 x Ø9
PA-GF	50	10 x 50	2500 N		B 42-50
	50	10 x 100	2500 N		B 42-00
	50	16 x 50	3500 N		B 44-50
	50	16 x 100	3500 N		B 44-00
	90	16 x 50	5000 N		B 45-50
	90	16 x 100	5000 N		B 45-00
Aluminium	90	16 x 50	10000 N	B 45-51	B 45-52 (-D)*
	90	16 x 100	10000 N	B 45-01	B 45-02 (-D)*

* These versions are also available with damping components: add -D to the order number.

Wheels

Application

Universally applicable, everywhere where mobility is required.

Specification

Shackle: Galvanized steel, ball bearing
Wheel: Rubber running wheel, ball bearing

Wheel	Ø	wide	high	Thread dia. / M x L	Order number without brake	Order number with brake
Wheels	50	18	70	Ø 10,3	B 48-50	B 49-50
Wheels	75	25	97	Ø 10,3	B 48-75	B 49-75
Wheels	100	32	132	Ø 10,3	B 48-100	B 49-100
Wheels	100	32	132	M 16 x 25	A 48-100	A 49-100
Wheels	125	32	158	Ø 10,3	B 48-125	B 49-125
Wheels	125	32	158	M 16 x 25	A 48-125	A 49-125

Other dimensions and conductive wheels can be supplied on request.

The complete range with more information can be found on page [167](#).

Plastic Caps

For Tube Clamps

For Aluminium Tubes

Nominal diameter	Order Number
20	R10-20
30	R10-30
40	R10-40
50	R10-50

The tube clamp units are generally supplied with plastic caps.

Nominal diameter	Order Number
20	R11-20
30	R11-30
40	R11-40
50	R11-50

Clamp Lever

All tube clamp elements can also be supplied with clamp levers:

Add ...-K or ...-2K to the order number.

Nominal Thread M	Dimensions: B	G	H	L	Order Number
M6	45	29	25	-	R65-60
M6	45	29	25	16	R65-62
M6	45	29	25	32	R65-63
M8	63.5	38	31	-	R65-80
M8	63.5	43.5	38.5	20	R65-82*
M8	63.5	38	31	40	R65-84
M8	63.5	38	47	16	R65-81

*Lever: plastic

Adjustable Units

The Kanya Adjustable Units have been specifically developed with low cost in mind. The modular kit principle means that joints can be assembled at reasonable prices. The customer is free to choose according to his requirements – the Adjustable Unit still remains a standard item. The selection includes three sizes with different adjustment ranges. The spindle end is manufactured according to your specifications, or is fitted with a handwheel.

Ordering Information

Examples:

VE - 20	1250	90	31	-	M 12	90	Ø 10 x 20	
VE - 40	2300	91	31	41	TR 16	30		HR Ø 160

Warehouse items	Stroke	Support A/B	Slide 1/2	Spindle	Shaft end	Handwheel
VE20	-1500	R02-90 / -91 / -30	R02-31-GL / -41-GL	M12 x 1.75 / TR 12 x 3	as indicated	HR - Ø 80 / Ø 100
VE30	-2000	R03-90 / -91 / -30	R03-31-GL / -41-GL	M16 x 2.0 / TR 16 x 4	as indicated	HR - Ø 125
VE40	-2500	R04-90 / -91 / -30	R04-31-GL / -41-GL	M20 x 2.5 / TR 20 x 4	as indicated	HR - Ø 160 / Ø 200

See pages 221 – 224 for measurement information on the Supports and Slides
Other diameter and inclinations on request

Kanya supplies the Adjustable Units fully assembled. Please enquire about additional items which we are able to supply.

Note Adjustable Units:

VE20 up to	900 mm
VE30 up to	1200 mm
VE40 up to	1500 mm

Adjustable Units

Use

Simple adjustment mechanisms with average precision and normal phase times. This adjustable unit is robust and reliable, and can be used wherever costs need to be kept down or wherever cost-effectiveness is the decisive factor.

Mechanical engineering, automation, laboratories, photographic studios, table adjustments, etc.

Versions

- ① with metric threaded spindle
- ② with trapezoidal threaded spindle and handwheel
- ③ with pneumatic cylinder

... or to your specifications.
