Our service range

- ✓ range of articles ex stock
- ✓ extrusions cut to measure and processed
- ✓ consultation and engineering
- ✓ pre- or completely assembled
- ✓ external material procurement

Aluminium extrusion system – modular with simplicity

Kanya AG is a leading global supplier of aluminium extrusion system and stands out due to its Swiss quality. Based on the Kanya aluminium extrusion system, we supply design solutions in the sectors of special-purpose engineering, automation and the machine manufacturing industry.

In our headquarters in Rüti ZH (Switzerland), over 50 employees work in the sectors of sales, engineering, production and assembly. The modern industrial building with an area of over 3500m² offers optimal requirements for efficient order processing. Globally, we work together with over 20 long-standing independent partners. Our international contractual partners have their own warehouses and the associated production infrastructure. This network means that Kanya profiles and components are available to all intents and purposes over the whole world.

Milestones

1974

Kanya AG founded by Gertrud Rüegg

1982

Walter Bär participates in Kanya and manages the technical department.

1994

Company anniversary – 20 years Kanya AG

1975

Patenting of PVS® extrusion connection system

1990

Worldwide more than ten representatives

2008

Succession plan
through Bachtel Group
(Clemens Ruckstuhl and
André Müller)

2014

Company
anniversary –
40 years
Kanya AG

1997

Opening celebration –
new location in Rüti
(Switzerland)

2013

Foundation of branch office
Kanya China

2016

Extension of the
factory building
by 1'200 m² in
Switzerland

Our products

Extrusion Connecting System PVS®

With the aluminum modular system, you will solve any construction task professionally, flexibly, durably and reliably. Our product range includes over 150 different profiles which are easily and safely connected with our connectors.

Tube Clamp System RVS®

The Tube Clamp System provides creative and versatile solutions in response to a huge variety of requirements in the field of machine and apparatus construction. An optimal static is guaranteed thanks to the precise machined clamping elements.

Accessories

The Kanya modular system allows an easy fixing of various accessories. The assortment of over 1'500 articles ranges from end caps, base connecting elements, panels up to angle extrusions and much more.

50 base extrusion

These extrusions are used wherever very high loads with small deflections must be supported.

45 base extrusion

Ideal complement to other extrusions with base 50, 40, 30 and 20.

40 base extrusion

The universal extrusion is extremely stable and has a good price-performance ratio.

30 base extrusion

Lightweight but stable extrusion for simple constructions and universal use.

20 base extrusion

Can be used for low load-bearing and filigree constructions.

Kanya system advantage

Due to the same nutdimension all different parts are compatible with each other.

Product line

Workplace systems

Kanya Ergoplace offers efficient, ergonomic and tailor-made solutions for workplaces in industry and business. The range includes tables with height-adjustable lifting columns, lights, brackets, shelves, base units and much more. Based on the Ergoplace checklist we will be happy to find out your needs.

KLINK®

The Kanya Klink system makes it even easier to keep things in order, maintain an overview thus increase productivity. The Klink system consists of shelves of different sizes, a suspension extrusion and suspension rails which can be easily hooked into the workstation. This reaches finally an end to the search for tools.

Machining doors

Kanya Safe is a modular system solution for safety doors and protective enclosures. Numerous solutions can be implemented in a wide range of applications with the flexible modules and components. Kanya Safe offers the right solution for every requirement, regardless of whether it is for a machine housing, a double lifting-door or a multi-part safety door. The system solution can be altered or modified at any time to meet the requirements.

Machine base frame and housing

Workplace systems

Operating material

Machining door

Automation and conveyor technology

Protective cabinet and noise protection

Machine base frame and housing

Today, machine claddings do not just fulfil the task of protecting persons, but rather they are an integral part of the machine with a high demand on design. For a high-quality cladding that is tailored to the machine, the versatility of the Kanya aluminium profile modular constructions present the ideal prerequisites.

The standard anodised profiles can also be powder-coated to the desired colours. In combination with a wide variety of surface elements such as acrylic glass, wood and metal, the opportunity presents itself for setting the emphasis on integrating the machine in a sophisticated overall appearance.

Kanya system benefits

- ✓ high protective function such as safety, noise and sound protection
- ✓ sophisticated overall appearance (design)
- ✓ according to the machinery directives

Solutions

Machine housing

Plastic parts processing after injection moulding process

Properties:

- protected region
- several opening ranges
- robust design and stability

Machine top

Injection moulding machine for PET manufacture.

Properties:

- dust protection
- sliding frames

Machine base frame

Transport and production module in the circuit boards industry

Properties:

- rigid rack structure
- attractive design
- modular construction

Workplace systems

The labor law requires an ergonomic design of workplaces. Optimised work processes and a corresponding infrastructure improve productivity. The ergonomic aspect is an important component of a workplace. Heightadjustable workbenches, optimal bench dimensions, lighting and individual tool positioning are just a few examples of a direct or indirect impact on the health, motivation and performance of the employees.

Kanya Ergoplace satisfies all conditions for an ergonomically oriented workplace system. Workplace systems are easy to assemble, are based on a modular design and can be extended flexibly.

Kanya system benefits

- ✓ customized solution
- ✓ ergonomically optimized
- ✓ modular, flexible and simple installation
- ✓ «Industry 4.0» solution

Solutions

Packaging workplace in the logistics

Properties:

- height-adjustable desks and workbenches
- optimal desk dimensions
- individual storage shelves

Assembly workstation in the production area

Properties

- height-adjustable desks and workbenches
- individual tool positioning
- lighting depending on the work process

Interlinked workplace (assembly and production line)

Properties:

- simple to complex solutions
- modular and flexible

Operating material

Whether it be tool trolleys, medicine trolleys or a vehicle construction for a pick-up. Tailor-made solutions can be constructed using the Kanya profile connection system (PVS). Our engineering team has many years of experience in applications with the Kanya aluminium profile modular construction system.

We are equipped with the most modern IT systems with which we formulate solutions for you and set up the required list of items. Use our know-how and tell us your construction ideas.

Kanya system benefits

- ✓ tailor-made solution
- ✓ modular and flexible
- ✓ simple installation

Solutions

Operating tool trolley

Properties:

- light base frame
- multifunctional mounting options
- easy to extend at any time

Workshop trolleys

Properties:

- lower cabinet integrated as a trolley
- light frame

Medicine trolley

Properties:

- robust design and stability
- personalised access with RFID chip
- simple cleaning of the material
- good running characteristics of the rollers

Machining door

Machine doors safely separate the work area between human and machine. But also the opening and closing times, which directly influence the increase in productivity, are also relevant to the safety aspects.

Kanya Safe is a modular system solution for safety doors and protective enclosures. Numerous solutions can be implemented in a wide range of applications with the flexible modules and components. Kanya Safe offers the right solution for every requirement, regardless of whether it is for a machine housing, a double lifting-door or a multi-part safety door. The system solution can be altered or modified at any time to meet the requirements and thus represents a sustainable investment.

Kanya system benefits

- ✓ simple, ready-to-install solution with drop guard
- ✓ robust construction and thin construction depth
- ✓ extremely compact design
- ✓ CE compliant (EC declaration of conformity)

Solutions

Double lifting-door

Properties:

- high opening speed
- minimal effort when opening and closing
- laser resistant, resistant against contamination due to Kanya sliding guides
- integrated protective machine door control system double-lifting door

Machine safety door

Properties:

- free access for loading and unloading
- double lifting-door

Laser protection lift door

Properties:

- ready-to-install solution
- robust construction
- laser protection class 4

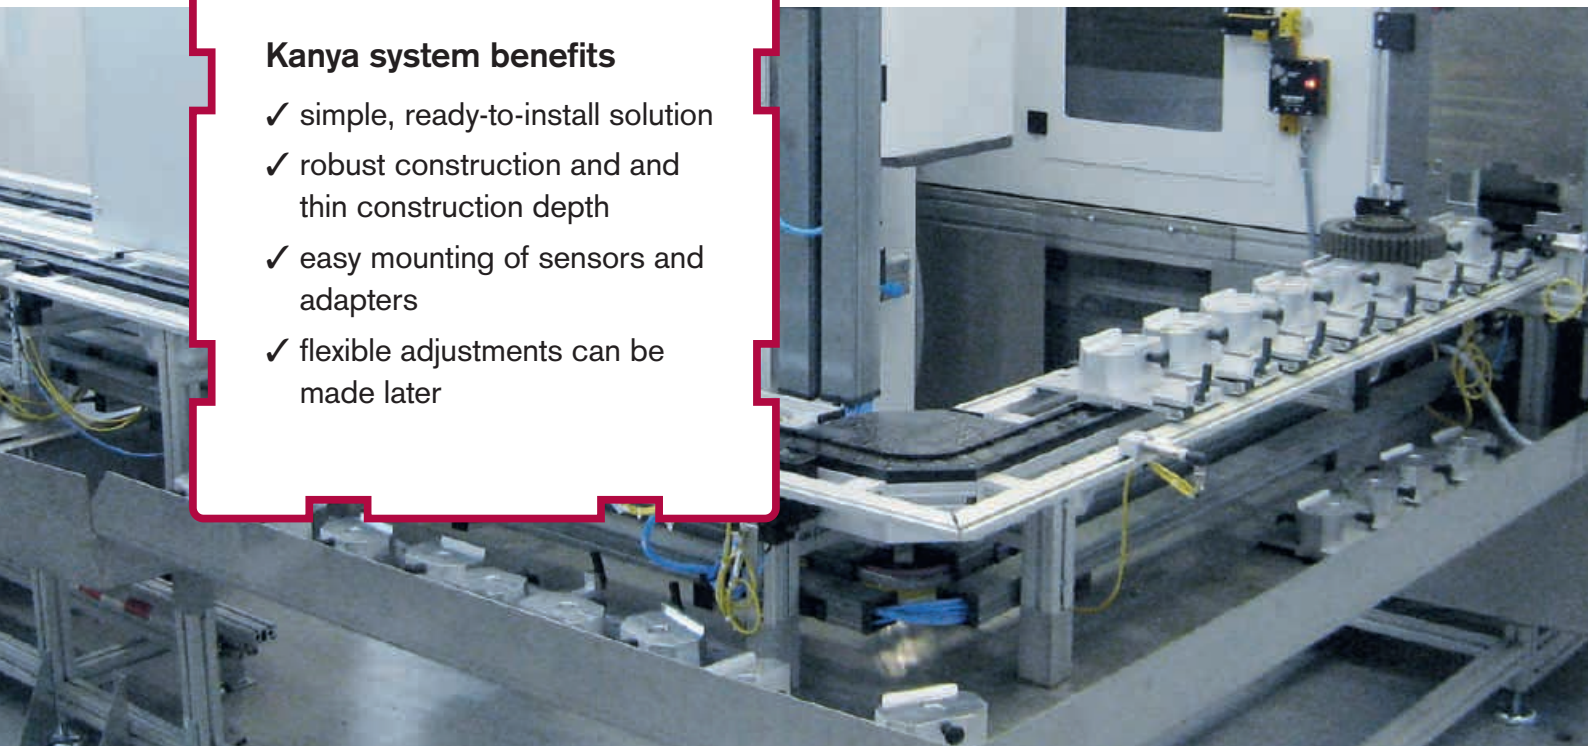

Automation and conveyor technology

In the manufacturing processes of today, economic flexibility is in particular demand. A wide variety of construction parts are assembled, processed or measured at increasingly shorter intervals on specially manufactured clamping and mounting devices.

The Kanya profile system ensures that the layout of the devices does not become a disproportional cost factor,. The versatility and modularity of the modular construction system enables the widest variety of requirements to be cost-effectively and readily adapted.

Kanya system benefits

- ✓ simple, ready-to-install solution
- ✓ robust construction and thin construction depth
- ✓ easy mounting of sensors and adapters
- ✓ flexible adjustments can be made later

Solutions

Table conveyor system with chain conveyor

Properties:

- tight bends save storage space
- easy to assemble

Conveyor system for an assembly system for automobile axles

Properties:

- load capacities up to 400 kg/cassette
- freely configurable
- low-noise
- robust and durable

Conveyor system for automation of a processing machine

Properties:

- high modularity for complex layouts
- used for loading and unloading of processing machines
- robust and durable

Protective cabinet and noise protection

The effects of noise pollution at the workplace on concentration, performance and motivation as well as the well-being of the employees must not be underestimated. If the permissible threshold limits are continuously exceeded, sustained noise leads to health damage. For this reason, the Occupational Safety Act specifies very clear reference values that protect health and safety.

Kanya system benefits

- ✓ individual noise protection systems prevent health damage
- ✓ comply with the employment law (EU: Occupational Safety Act)
- ✓ protection against mechanical damage

Solutions

Protection cabin

Low-pressure cabin for the manufacture of power storage modules

Properties:

- extremely airtight construction
- ESD construction
- accessibility through large sliding doors

Noise protection

Noise protection cladding for winding machine electric motors

Properties:

- noise level reduction
- unhindered access through the door front with special noise protection glazing

Noise protection

Noise protection airlock for endurance test system of angles grinders

Properties:

- noise level reduction of 28 dB(A)
- total access to the test room
- unhindered access through the door front with special noise protection glazing

Extrusion tolerances, extract from EN 12020-2

1. Straightness tolerances

Cavity extrusions may not exceed the values stated in the table for the straightness tolerances h_1 . The deviation h_2 may not exceed a maximum of 0.3mm over any length of $l_2 = 0.3$ mm.

Length l_1 in m	up 1 m	up 2 m	up 3 m	up 4 m	up 5 m	up 6 m
Tolerance h_1 in mm	0.7	1.3	1.8	2.2	2.6	3.0

2. Twist tolerance v

The length-dependent twist tolerance v for cavity extrusions is shown in the table.

Width b in mm	Flatness tolerance v in mm for lengths in mm					
	- 1000	> 1000-2000	- 2000-3000	> 3000-4000	> 4000-5000	> 5000-6000
- 25	1.0	1.5	1.5	2.0	2.0	2.0
> 25 - 50	1.0	1.2	1.5	1.8	2.0	2.0
> 50 - 75	1.0	1.2	1.2	1.5	2.0	2.0
> 75 - 100	1.0	1.2	1.5	2.0	2.2	2.5
> 100 - 125	1.0	1.5	1.8	2.2	2.5	3.0
> 125 - 150	1.2	1.5	1.8	2.2	2.5	3.0
> 150 - 200	1.5	1.8	2.2	2.6	3.0	3.5
> 200 - 300	1.8	2.5	3.0	3.5	4.0	4.5

3. Inclination tolerance w

Where sides are of unequal length, inclination tolerance shall be relative to the angle of the shorter side.

Width b in mm	Inclination tolerance w in mm	Width b in mm	Inclination tolerance w in mm
- 30	0.3	> 120 - 140	0.8
> 30 - 50	0.4	> 140 - 160	0.9
> 50 - 80	0.5	> 160 - 180	1.0
> 80 - 100	0.6	> 180 - 200	1.2
> 100 - 120	0.7	> 200 - 240	1.5

4. External tolerances

Width b, h in mm	Deviation in mm	Width b, h in mm	Deviation in mm
> 15 - 30	± 0.25	> 120 - 150	± 0.80
> 30 - 45	± 0.30	> 150 - 180	± 1.00
> 45 - 60	± 0.40	> 180 - 240	± 1.20
> 60 - 90	± 0.45	> 240 - 300	± 1.50
> 90 - 120	± 0.60		

Strength calculations

Load case 1

$$f [\text{mm}] = \frac{0.476 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

Where:

- F = load in N
- L = extrusion length in m
- I = moment of inertia in cm⁴
- f = deflection in mm
- a/b = distance to the load point in m
- q = line load in N/m

Example:

A counterweight with a max. load of 500 N is to be fastened to an extruded arm 800 mm long. What will be the deflection of a 40x40 mm C01-1 type base extrusion?

$$\text{Deflection } f = \frac{0.476 \times 500 \times 0.8^3}{11.70} = 10.42 \text{ mm}$$

Checking the bending stress:

$$\delta = \frac{M_b}{W \times 10^3}$$

- δ = bending stress in N/mm²
- M_b = max. bending moment in Nmm
- W = section modulus in cm³

Load case 2

$$f [\text{mm}] = \frac{0.0074 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

Example:

An 1800 N load is placed in the middle of a beam. The unsupported length is 1200 mm. The max. permissible deflection is 1.0 mm. What sort of extrusion should be used for the beam?

$$\text{Deflection } f = \frac{0.0074 \times F \times L^3}{I} \Rightarrow I = \frac{0.0074 \times F \times L^3}{f}$$

$$\text{Moment of inertia } I = \frac{0.0074 \times 1800 \times 1.2^3}{1.0} = 23.02 \text{ cm}^4$$

⇒ Selection: Use a heavy duty extrusion MA1-1 where I = 29.37 cm⁴

All calculation examples are based on clamped condition.

Load case 3

Example:

A cross-beam measuring 2500 mm in width has to support another beam 850 mm from the end of the cross-beam. The support load is 1200 N. A 50 x 100 base extrusion is used as the cross-beam. How great is the deflection at the point where the beam is placed?

$$f [\text{mm}] = \frac{0.476 \times F [\text{N}] \times a^3 [\text{m}] \times b^3 [\text{m}]}{I [\text{cm}^4] \times L^3 [\text{m}]}$$

$$\text{Deflection } f = \frac{0.476 \times 1200 \times 1.65^3 \times 0.85^3}{149.84 \times 2.5^3} = 0.67 \text{ mm}$$

a > b

$$f_m [\text{mm}] = \frac{0.952 \times F [\text{N}] \times a^3 [\text{m}] \times b^2 [\text{m}]}{I [\text{cm}^4] \times L^2 [\text{m}]} \left(\frac{L [\text{m}]}{L [\text{m}] + 2a [\text{m}]} \right)^2$$

a < b

$$f_m [\text{mm}] = \frac{0.952 \times F [\text{N}] \times a^2 [\text{m}] \times b^3 [\text{m}]}{I [\text{cm}^4] \times L^2 [\text{m}]} \left(\frac{L [\text{m}]}{L [\text{m}] + 2b [\text{m}]} \right)^2$$

Where:

- F = load in N
- L = extrusion length in m
- I = moment of inertia in cm⁴
- f = deflection in mm
- a/b = distance to the load point in m
- q = line load in N/m

Load case 4

Example:

A measuring plate (whose intrinsic stability is ignored) may not bend by more than 0.4 mm. The measuring table is 1500 mm deep and the line load on each side of the table is 8000 N/m. Which extrusion must be used to support the measurement plate?

$$f [\text{mm}] = \frac{0.0037 \times F [\text{N}] \times L^3 [\text{m}]}{I [\text{cm}^4]}$$

$$F = q \times L = 8000 \times 1,5 = 12000 \text{ N}$$

$$\text{Deflection } f = \frac{0.0037 \times F \times L^3}{I} \Rightarrow I = \frac{0.0037 \times F \times L^3}{f}$$

$$\text{Moment of inertia } I = \frac{0.0037 \times 12000 \times 1,5^3}{0,4} = 374.64 \text{ cm}^4$$

⇒ Selection: Use a heavy duty extrusion MA1-5 (100 x 100) where I = 380.00 cm⁴

$$F = q \times L$$

All calculation examples are based on clamped condition.

**Extrusion machining
information**

Ordering overview Extrusion machining codes

The order number is made up of the type of extrusion, with the machining code for each end and the length of the extrusion. The available codes for the machining are listed on the following chart. The code covers the most standard machining.

Special machinings are indicated with the order code «-99». In this case, a customer drawing is requested!

An item number is made up of the following:

- ① Select the appropriate design or special extrusion (extrusion type)
- ② Define the machining on the left side of the extrusion according to the following overview if the left side of the extrusion is to be left unmachined: Code -02
- ③ Define the machining on the right side of the extrusion according to the following overview if the right side of the extrusion is to be left unmachined: Code -02
- ④ Indicate the required extrusion length in mm/L

Special machining:

- ⑤ -99

Order number
with standard machining

Order number
with additional special machining, the order code also indicates -99

Example: C01-1 - 11 - 13 **-99** / 200

Technical data

Extrusion machining information

Application

The drill jig and special drill bits make it easy to drill the holes for KANYA's patented PVS® connector. The main advantage of the drill jig is that it clamps directly onto the extrusion. The rotating stop, for square or mitred cuts, guarantees the precise drilling distance.

The HSS special drill bit, with the MT2 Morse taper shank, is ground flat to cut the extrusion surface. It can be re-sharpened as often as necessary.

A special drill bit with a 90° point is used to drill the C03-8, B01-8 softline extrusion and the A02-8 and C02-8 angle extrusions.

Standard 90° joint "25" stop

Mitre joint "32" stop

That drill, allows a connection for a parallel connector at any position at the extrusion.

Four sided softline extrusion 50x50 type A10-0

Application

The 50 series Softline extrusion is used to create stable, attractive and easily washable constructions. Ideal for clean room applications. Due to the small curved corners, there are no dirt grooves with a T-connection. A very decorative extrusion which offers the designer many application possibilities whilst at the same time also being lightweight and inexpensive.

Standard length 5000 mm	A01-7-00/5000
50x50 corner extrusion	
Cut to length	A01-7-02-02/...
Extra machining	Pages 43-47

Application

Corner and face extrusions are used in any applications where closed surfaces are required. The advantages of these are that they improve the appearance of the structures and also minimise the build up of dirt. Extrusions can be fitted onto the closed faces by drilling holes in the outer face of the extrusion at the required points and using AC32-... type threaded plates. The small lugs inside the extrusion guide the plates.

50 mm base extrusion

50x50 double face extrusion type A02-4

50x45° angle extrusion type A02-8

Application

For all types of enclosure, as well as for structures with extrusion faces which are mainly closed and for applications with an attractive design.

50x50 face extrusion with rip off panel slots type A03-8

* Rip off slot

Application

The one face closed extrusion gives the possibility to open a slot to insert a panel, ideal for delicate solar-panels. Rip off the slot, if necessary put in a sealing strip, insert panels and mount the frame. The 8 mm panels fit perfectly in the rip off slot.

Cut to length	MA1-4-02-02/...
Extra machining	Pages 43-47

Application

An extrusion which boasts all the advantages of the comparable A01-2 and MA1-2. In addition, its large inner cavity can be used to channel air, gas, water, oil, etc. The driving belt on a twin-belt conveyor can also be fed back in this chamber. The sealed face keeps dirt out. The extrusion can be extended using the closed threaded-plate slots. Simply drill a hole, place a threaded plate behind the hole and carry on building!

100x100 base extrusion type MA2-5

Application

This versatile extrusion is mainly used in machinery and plant construction and boasts the following qualities:

- high strength
- excellent torsional rigidity
- low weight

Technical data

$I_{x,y}$	=	324.73 cm ⁴
$W_{x,y}$	=	64.95 cm ³

Extra machining Pages 43-47

Application

Corner extrusions are always used when closed surfaces are required. Particularly with larger machine casings, this extrusion is frequently used as a corner pillar that can absorb weight at the same time, but also optimises the look of the machine. With a base plate (A47-80) a central adjustable foot can also be installed.

50x150 beam extrusion type MA1-3

Application

This extrusion is mainly used to support heavy loads because of its excellent load-bearing characteristics. However, it is also an effective manifold extrusion.

Technical data

40x40 base extrusion type C01-1

40x40 face extrusion type C01-8

Application

These versatile extrusions can be used for all kinds of structures. With their 40 mm base, they complement extrusions with 20, 30 and 50 mm bases perfectly. The base extrusion itself is extraordinarily sturdy and is hard to beat in terms of value for money.

Base extrusion 30x50 type B01-9

Application

Used for all types of structures, base frames, trolleys, conveyor belts, etc. Universally used, easy to use in conjunction with extrusions with bases of 30, 40, 45 or 50. This extrusion is sturdy and strong, despite using little aluminium.

Application

Ideal for any application which requires an attractive design and structural stability. This is another versatile extrusion which can be used for tackling a wide range of different problems.

These extrusions need a special barrel if the connector is fitted on the short side (see image). The connectors with the long barrels have the following item numbers:

Face extrusion 30x50 type MB2-9

30 mm base extrusion

30x60 base extrusion type B01-6

60x60 base extrusion type B02-6

Application

Ideally suited for use as a cross-beam or for building lightweight conveyor belts. A versatile extrusion for many applications.

Application

Mainly used as a brace. Levelling feet and castors can be attached using the threaded inserts B33-60 or B33-64 (page 157).

20x20 base extrusion type D01-5

20x20 corner extrusion type D01-3

20x20 face extrusion type D01-8

Application

Due to their relatively low weight and strength this 20x20/40 range of extrusions can only be used for small loads, such as limit switches fixtures, smart work frames, small display cases, etc.

Helicoil inserts (DIN 8140) can be used for all extrusions with a core hole of Ø6
See machining code H3/H4.

The 20x20 and 20x40 extrusions are also suitable as a support or reinforcement extrusion behind panels, which is in combination with the base 30 extrusion with panel slots (see sketch).

Face extrusion 20x50 type D02-5

Application

With this combination extrusion 20x50mm, the 20 series extrusion cross-sections can be easily connected to the 50 series ones. The large centre allows a connector of the 20 base with $\varnothing 12.1$ to be fitted

Application

This 20x100mm extrusion is lightweight and nevertheless very sturdy when positioned on its edge. Used in the construction of apparatus racks if closed faces are required. Can also be used as skirting boards along passages.

8x13.5 U-clamping extrusion type B19-6

Application

A special extrusion for clamping the wire mesh. The U-extrusion fits into all extrusions with a base of 50, 45, 40 and 30 mm.

11x30.5 support extrusion type B19-7

Application

The support extrusion is twisted into the 8 mm slots on the standard design extrusions and is used to support table tops, shelves, panels, etc.

Measurement data

Extrusion size	D
Base 30	10
Base 40	15
Base 45	17.5
Base 50	20

Aluminium guide extrusion type B19-8

Application

This aluminium guide can be easily clipped into all slots of Base 50/45/40/30. With 30 base extrusions, a snap-in function prevents the guide from falling out. With 50/40 base extrusions, the guide is jammed in the slot. If necessary, a steel pin $\varnothing 6$ can also be pressed in on the side which prevents any possible movement of the guide. Advantages of this guide are:

- Quick and easy fitting, and inexpensive
- Closed slots reduce the build up of dirt
- Can be retrofitted at any time onto existing structures

Sliding doors are so easy and inexpensive to produce. Used especially in applications where the build up of dirt in an open slot or guide is to be prevented.

This extrusion is primarily used as a running rail for the concave roller.

Wheeled runner, see Page 167.

Standard length 5000 mm	A60-5-00/5000
20x36.5 hinge extrusion	
Cut to length	A60-5-02-02/...

Handle strip extrusion type B65-5

Application

Source material for handle strips or handles with special-length.

Specification

Aluminium anodised

Technical data

Cross-section area = 2.18 cm²
Weight = 0.59 kg/m

Order data Order number

30x35 handle strip extrusion
Standard length 5000 mm B65-5-00/5000
30x35 handle strip extrusion
Cut to length B65-5-02-02/...

Clamping blocks

Application

To connect two extrusions of base 50, 40 and 30. A very sturdy cross or parallel connection is produced. Two clamping blocks are required to create the parallel connection.

Clamping blocks machined, see page 150

Measurement data

Type	A	C	D	E	F	G	kg/m

Rectangular tube

Application

With the rectangular tube and with the combination of the extrusions base 50, 45, 40 und 30 a telescope function can be easily created. Can also be used as a guidance for a counter balance in a construction with a lift gate in addition to many «classic» rectangular tube applications.

Connection technology

Kanya connection technology

The extrusion connection system PVS® opens up new possibilities for all structural design problems, whether for machinery, transfer and handling systems, guards, machine enclosures, work benches, laboratory facilities, cabinets, room partitions or exhibition stands. Rectangular, round, square or diagonal, fixed or swivelling; Kanya is the perfect solution.

Quick, secure connections:

Kanya PVS® makes it possible to erect any structure in a very short time. The system centers around Kanya's own invention, the internationally patented PVS® connector. Any extrusions can be joined together securely.

Simple and versatile assembly:

The two fundamentals which allow you to build a structure to your own design are ease of assembly and a comprehensive range of extrusions and accessories. Modifications or additions can be easily made, when the need arises, without wasting any material.

Highly cost-effective:

Any part can be customised. There is no need for expensive finishing or surface treatments. Expensive construction is minimised, saving time and reducing costs. All the parts can be reused repeatedly since all joints are simple to dismantle. That's what makes this system the most cost effective you can buy in the long run.

An example of making a simple 90° connection.

All the Kanya PVS® connections work on this simple principle, regardless of direction or size.

Connection technology

1. Insert the barrel into the hole made in the second extrusion.

2. Insert the sprung anchor into the centre hole of the barrel.

3. Push the anchor head into the slot of the first extrusion; twist 90°. Tighten the Allen screw. That's all.

PVS® connectors - overview

1. Universal connections

The round anchor head allows the extrusions to be set in any position, however it must first be pushed into the retaining slot. **Also available in stainless steel or providing electrical bonding. (electrically conducting)**

2. Standard connections

The milled anchor heads allow extrusions to be added subsequently. Horizontally and vertically milled anchor types are required to guarantee that every extrusion position is possible. **Also available in stainless steel or providing electrical bonding. (electrically conducting)**

3. Combination connections

To provide the optimum connection for all cross-sections, the combination connectors are used in a similar way to the standard connection.

4. Special connections

The special anchor, which is available in different lengths, makes parallel and cross connections possible.

5. Mitred connections

The formed anchor head – 15°, 30° and 45° in both left and right designs – or with an articulated head to create connections at virtually any angle

6. Double mitred connections

The anchor which can be swivelled from 0° – 90° can be used universally and creates a sturdy frame with slots all around.

7. Extrusion extensions

The rigid anchor guarantees an extremely stable extrusion extension

8. Threaded connections

The threaded anchor (M6 / M8) enables the extrusion to be attached to other structures. And the erection of a machine safety guard on an existing work top without any additional fixings.

Connection technology

Covering cap for PVS-connector

PVS® screw «Safe»

Special PVS® screw Safe M12x12 for safety constructions which must not be easy to dismantle by unauthorised persons. A pin inhibits access to the screw so that it cannot be unscrewed using a commercially available Allen key.

Application

The covering cap for the PVS-connectors have two functions: aesthetics and protection. With the connector on a face side of an extrusion, it covers the visible part of the connector.

If the application is in a dirty environment, it is wise to protect the screws from dirt to allow functionality.

Strength specifications

That chart shows the shearing forces in relation to torque and number of connectors of the most important extrusion combinations.

At a torque of 30Nm lies the shearing force for a connection with one connector at approximately 4000N.

Recommended torque: for the universal- and standard connectors:

Extrusion base 50/45/40: 30–35Nm

Extrusion base 30/20: 20–25Nm

Extrusion base 20 (Ø6): max. 6Nm
(other connectors on request)

Remark:

The tightening torques should not exceed above mentioned recommended specifications:

⇒ The anchor head may be damaged or broken.

Those in the chart stated tractive forces are approximate value. Conditions: Preload of connectors with max. tightening torques!

Thrust forces

No.	extrusion	joints	Line Style
1	50x50	1	Solid Blue
2	40x40	1	Dashed Green
3	30x30	1	Solid Red
4	30x50	1	Solid Red

PVS® direct connectors

Base 50

Base 45

Base 40

Base 30

Application

The extrusion does not need to be machined for this connection. This selfcutting threaded sleeve has a shank for an Allen key which is simply used to screw it into the longitudinal slot. The screw is mounted into the threaded sleeve in advance, thereby connecting the extrusion to the extrusion nuts in the counter extrusion. These can be installed afterwards. This stable connection, assembly is slightly more complex than with the PVS® standard connector. The prerequisite for this connection is access on both sides to the slots.

Note

The side slots are blocked by the connection. Panels would therefore have to be machined the site of the fasteners.

Selfcutting threaded sleeve

Built-in connector

Due to the direct transmission of force, the PVS®-direct connector is slightly higher in strength on thrust than our main connector. However, under moment loads, the groove can bend open. The base 30 is not optimally suited in terms of groove depth, as the thread insert protrudes slightly from the groove.

Parts supplied

- 2 screws
- 2 threaded sleeves
- 2 swivel in nut

Order data	Order number
Base 50	A33-90
Base 45	E33-90
Base 40	C33-90
Base 30	B33-90

The Kanya connection technology

PVS®-SUPERLIGHT

1. Insert the self-cutting threaded insert into the extrusion centre hole.

2. Drill a stepped hole into the extrusion.

3. Tighten the socket-head cap screw – finished!

Note:

Instead of a stepped hole, you can also just drill a simple hole for the allen key and then insert a round-head screw into the counter slot.

Cable bridge for electrical conductivity

Application

If extrusions have to be electrically connected with other components, e.g. ESD, these connections can be realized with simple components.

We recommend the connectors with potential equalization (-P) for Kanya extrusions.

Parts supplied

- 1 Swiveled extrusion nut (2)
- 2 grub screws with point (2x)
- 3 washers (2x)
- 4 cables with cable lug approx. 100mm (1x)
- 5 swiveling cap nuts (2x)

Mounting brackets

Application

The bracket is aligned in the centre distances for base 45. The elegant support arch permits good access for tightening the bolts.

Specification

Aluminium, matt, anodises in natural colours

Order data	Order number
Mounting bracket 85x85x30	E30-30
Mounting bracket 85x85x75	E30-32

Brackets

Application

Due to its size, the small bracket can be mounted lengthwise, but also crosswise to the extrusion. The matching cover cap conceals the screws and also meets design requirements.

Specification

Die-cast zinc, grey powder-coated RAL 7035

Scope of delivery

- 1 zinc die-cast angle
- 1 black plastic cover cap

Base	A	B
50	50	25
40	40	20

Order data	Order number
Bracket, Base 50	A25-10
Bracket, Base 40	C25-10

Mounting bracket and dowel

Application

The mounting bracket and dowel are used in any application where the extrusions are subjected to torsion but must not twist. A safe extrusion connection.

Specification

Aluminium, matt,
anodised in natural colours

Clamping block Base 50/40/30

Application

To connect two extrusions of base 30, 40 or 50 in parallel or crossing. Two blocks are required to create a parallel connection.

Specification

Aluminium anodised
Screw: Zinc-coated steel

Parts supplied

1/2 clamping block(s), screws
threaded plates

Uniblock

Application

The uniblock is used to secure all sorts of panels in place. The uniblock can be attached to the extrusion without having to use any screws thanks to the attached anchor-head. The panel is then screwed to the uniblock. The captive square nut provides a large tolerance range. Different spacers can be used to give the required gap between the panel and the edge of the extrusion.

Specification

PA-GF, black,
square nut, zinc-coated steel

Clamping block

Application

The clamping block can be used to mount panels to extrusions without any additional fixings. The panel is clamped in the block by means of a toothed slide, simply and without having to use a tool. Spacers can also be used in the clamping block to give the required gap between the panel and the edge of the extrusion.

Specification

PA6-GF30, black*
uv-resistant, grey

Attachment bracket

Application

The fixing angle is used to mount additional equipment, panelling, work tops, valves, electrical switchgear, etc.

The advantage of these is that they are slotted on one side, allowing fine adjustment.

Specification

Aluminium, matt, anodised in natural colours

T-bolts

Application

T-bolts are used to fasten all types of components and are simple to insert, even after assembly. The anti-twist shape is a help during assembly.

Specification

8.8 steel, zinc-coated

Scope of delivery

Screw, hexagonal nut, washer

Swivel in nut

Extrusion base 50/45/30

Extrusion base 40

Measurement data

Extrusion base	B	H	L
50/45	14	7.8	20
40	12.5	5.9	22
30	11	4.1	20

Application

The advantage of the swivel in nut is that they can also be inserted diagonally into the extrusion slots. The disadvantage is that the tightening torques >12 Nm may result in dents in the aluminium extrusion. Raw steel bars are available if you wish to machine special nuts.

If these nuts are tightened to a torque > 10Nm, they meet the ESD guidelines for use with lightweight extrusions.

Order data

M4	-	-	B32-47

* for base 50+45

Hammer nuts

Base 50/45/40

Base 30/20

Application

The spring and rhomboid nuts can be used for the same purpose as the threaded plates and the extrusion nuts. They can be inserted into the extrusion slot after assembly. The nuts can be spaced close together because they are only 8 mm wide. However, their load-bearing capability is clearly lower than those of threaded plates and extrusion nuts.

Specification

Zinc-coated steel; retaining springs: spring steel

Order data Order number

M6	AC31-65	BD31-65

Magnet nuts

Application

The magnetnuts can be inserted into the extrusions of the base 50 and 40 on the open cross section. They can be fixed on position with 2 small screws. With the magnet-nuts you can do a flat door fixing, fixing of metal housing or use it for holding tools.

Specification

Surround:	plastic
Screws:	zinc-plated
Magnet:	zinc-plated
Operating temperature:	up to 80 ° C

Order data Order number

Magnet nuts	Order number
Extrusion base 50	A32-86
Extrusion base 40	C32-86

End caps

Application

End caps are used as covers for the exposed ends of extrusions. They prevent injury from the sharp edges of the extrusions. Special centring elements make them easy to fix and prevent the caps from twisting. Two end caps can be used together to cap off larger extrusions, eg extrusion 80x120 uses two 40x120 end caps.

Specification

PA-GF, black / -G grey

Self-cutting threaded insert

Application

The self-cutting threaded insert has the advantage that no machining is required in order to attach elements on the face. Connections subject to tensile stress are primarily only ideal. This means that attaching levelling feet or casters is not recommended.

Note that there is no thread around * the hexagon socket.

Specification

Zinc-coated steel

Order data	Order number

Double bolting bracket

Application

An advance on the normal floor bolting bracket, with the added advantage that it can be used together with large levelling feet (Ø 90). The double bolting bracket also secures the supporting extrusions in two directions.

Specification

Steel, powder-coated in black

Single bolting bracket

Application

For easy fixing to the floor. As with the double bolting bracket, this single bolting bracket can be combined with a levelling foot.

Specification

Steel, powder-coated in black

Fixing kit*

- 2 screws
- 2 (3) threaded plates
- 2 washers

*Fixing kit: add -S to the order number

Single bolting bracket reinforced

Application

Same as the aluminium floor bolting bracket with the added advantage that it can be used together with large levelling feet Ø 90.

Specification

Steel, powder-coated in black

Order data	Order number

Single bolting bracket	A47-22(-S)*

Leg bolt-down socket

Application

The bolt-down socket is used in applications where the legs have to be very firmly secured to the ground. The extrusion can be adjusted easily within the guide socket and can be secured in place using the fixing kit included. The bolt-down socket should be chosen, from the three available, to suit the space available.

Specification

Steel, powder-coated in black

Fixing kit*

(applies to all types)

- 8 cylinder screws, 8 threaded plates
- 8 washers

Fixing kit*

(applies to all types)

- 4 cylinder screws, 4 threaded plates,
- 4 washers

Castors

Non-swivel castors

Application

Can be used in any application where mobility is required. There are four diameters of wheels available (with or without locks) depending on the load capacity required. Swivel and non-swivel castors have the same load capacity. (F)

The castors can be simply attached to the extrusions either with an M10 bolt or by means of an M16 / 14x25 threaded stud.

Range of application -17° to +60°C

Specification

- Fork: Zinc-coated steel,
Ball bearing
- Wheel: Rubber tyre 87° Shore,
Ball bearing
with «fender» made of POM light gray

Rollers

Application

This roller is suitable for heavy sliding doors, as a wheel for workpiece holders or for general structures which have to move freely.

Insert the guide flange into the extrusion slot. Fit the flat roller onto the other side. This creates the perfect trolley/rail combination independent of the extrusion tolerance.

Specification

Plastic roller, ball bearing mounted, steel spacer, gunmetal finish
Radial load
F = 500 N

Application

This ball bearing-mounted roller is mainly used in an assembly with the trolley extrusion, although it can also be attached directly to any extrusion.

Specification

PA 6 black
2 deep groove ball bearings with cover disks
F = 150 N

Concave roller

Application

This ball bearing-mounted roller is mainly used in an assembly with the trolley extrusion. It can however also be attached directly to any extrusion. The corresponding aluminium guide extrusion type B19-8 is used to produce an inexpensive roller guide in next to no time.

Specification

Plastic PA 6 black
2 deep groove ball bearings with cover disks
F = 150 N

Concave double-wheeled trolley

Double-wheeled trolley

Application

A wide range of different applications is possible with the double-wheeled trolley. It provides a simple and mechanically reliable way of creating equipment chassis, sliding doors, lifting devices etc. Any lengths of extrusion can be used. However, the spaces between rollers should not exceed 1000 mm for large trolleys.

Trolleys are also available with more than 2 rollers.

Using the concave rollers, together with the aluminium extrusion guide B19-8 on page 122, it is easy to produce easy cleaning guides.

Parts supplied

Aluminium extrusion with ≥ 2 rollers.
PVS® connector and/or cover caps fitted.

Plastic slide extrusions

Specification
 Black PE
 Sliding friction coefficient: 0,2
 Heat resistance to DIN 53461:
 -250 °C to 100 °C
 Indentation hardness to DIN 53456:
 39N/mm²

Measurement data

Extrusion base	A	B	C	D	E
50/40	21	21	4.1	4.1	2.3
50/40-30/20	14	16	4.1	2.2	2.3
30/20	14	14	2.2	2.2	2.3

Application

Ideal for any shape of slide guide, for instance for sliding doors or drawer runners. Simply push the slide extrusion into the aluminium extrusion slots – you can create a perfect, hard-wearing guide as easily as that.

Make the inner frame 5 mm smaller than the inner width of the outer frame. It is also ideal for static extrusion assemblies.

«Velcro» Cable ties

Application

This universal cable tie is made from a combination of Velcro material and a retaining clip. The Velcro can be cut to length with scissors. The quarter turn retaining the clip ensures easy fixing to the extrusions Base 50, 45, 40 and 30.

On the tie-wrap-base you can fix standard tie wraps. Fix with a M5-screw.

Channel reducing strip

Application

Channel reducing strips are used if 3, 4 or 5 mm panels are to be inserted into the extrusion slots.

Specification

Grey PVC for panels of 3, 4 or 5 mm in thickness
Plate insertion depth: 4 mm

Application

For thin sheets e.g. expanded metal, steel sheets, etc.

Specification

Grey PVC for panels up to 3 mm
Plate insertion depth: 4 mm

PVC filler strips

Application

The PVC filler strip can be clipped into the 8 mm longitudinal slot on any extrusion after assembly and is available in grey or black.

Specification

Grey or black PVC

Aluminium filler strip

Application

These aluminium strips can be used to blank off the longitudinal slots on all extrusions with a base of 40, 45 and 50. They are extremely easy to cut to length using tin snips or shears. They can be supplied at short notice in any RAL colour in addition to the standard colours (natural anodised or black powder coated).

Specification

Aluminium 0.8x 10
anodised or black
anodised with millimetre scale

Order data	Order number

L = 1000 mm	A39-16	A39-16
L = 2000 mm	A39-17	A39-18

Panel clamp extrusions base 50/40/30

Application

The grooves of the construction profiles are undoubtedly very practical. With certain constructions, however, they disrupt the appearance and attract dirt. The cover profiles made of aluminium facilitate a closed appearance despite maximum flexibility offered by the open grooves. Dirt can thus no longer be deposited either.

Specification

Aluminium anodised

Channel reducing strips and filler strips

Application

To hold panels which are 6 mm thickness. They can also be inverted to blank off the slots on triple channel extrusions.

Specification

Grey PVC

Application

When fitting 3mm panels for base 40 panels extrusions.

Specification

Black PVC

Supporting extrusion

Application

The supporting extrusion has two functions; it gives optimum support (pressure) to thin panels which are inserted into the narrow slots and at the same time it also covers the extrusion connector slots.

Specification

Suitable for panel thickness of 2–3 mm
Grey PVC

Cut to length	C39-45-02-02/...

Door stop profile

Application

As the name says, this profile is used as a door stop. The foot geometry means that it can be clipped into the basis 40. The soft sealing lip muffles firstly the closing and facilitates a certain tightness. It should be ensured that the door gap is of a correspondingly large size.

Specification

Hard (soft) PVC, grey

Cut to length	C39-70-02-02/...

Clamping sealing strip Base 30/20

Application

This sealing strip is used to stabilise and seal panels in the extrusion cross-sections of base 20 and 30. It is fitted after the panels are inserted.

Specification

TPE black, oil-resistant
For panels 5–6 mm thick

Clamping rubber seal

Application

These profiles are used for the installation of panels in the profile groove. The installation is done after the panels have been inserted. The rubber profiles can simply be

pressed into the existing gap. The material automatically results in a damping, sealing and stabilising effect.

Specification

Neoprene rubber black, oil resistant

Suspended guard fittings

Application

For an easy suspension of elements. Extrusion frames with panel-elements can be placed between two extrusions.

The vertical and the horizontal suspend position hold the panels in the defined position.

The nuts are placed in the slot and with screws it can be fixed from both sides.

Parts supplied

2 Suspensions +
2 Screws with Screw-nuts

Joint base 40/50

Specification

Aluminium, matt, anodised in natural colours

Screws and flats: steel zinc coated

Parts supplied

- 2 assembled joint halves
- 4 flats
- 1 fixation material S1, S2 or S3 as per situation 1 / 2 / 3

Application

Mainly used to strengthen structures with diagonal braces. It is also suitable to be used as a hinge for swivelling equipment stands, doors, etc. The (5 mm holes are designed to take dowels (which are included). Insert the dowels to give greatest stability.

Assembly situation

Fixation sets supplement product number with -S1, -S2 or -S3.

Joints base 40/50 with clamp lever

Specification

Base 50	50	85	A61-01
Base 40	40	65	C61-01

Joint base 30

Application

The joints of the basis 30 are fundamentally used as connecting elements in which a connection crosswise to the groove can be generated. At the front, the joint is screwed with a thread insert. The connection laterally to a profile is done with a threaded plate and the matching screw. The variant without clamp lever is clamped when the screw is tightened. The joint is not designed for permanent movement.

Specification

Aluminium, matted, natural coloured anodised

Parts supplied

- 2 joint halves loose
- 1x fixation material S1, S2 or S3 pursuant to situation 1 / 2 / 3
- 1 distance busing
- 1 cyl. screw M6x30

Assembly situation

Fixation sets supplement product number with -S1, -S2 or -S3.
For example: B61-00-S1

Order data	Order number
Joint base 30	B61-00

Joint base 30 with clamplever

Application

The joint with clamp lever serves to create pivotable constructions easily. It is important here that the joint does not have to absorb strength against the course of the thread as it can otherwise become loose.

Specification

Aluminium, matted, natural coloured anodised

Parts supplied

- 2 joint halves loose
- 1x fixation material pursuant to situation 1 / 2 / 3
- 1 clamp lever M6

Magnetic fasteners DUO

Application

This magnetic catch is highly adaptable. You can choose between two retention forces, depending on your requirements. The elongated holes also permit a large adjustment range.

Specification

Black plastic with a permanent magnet / pan-head screw with nut.

Order data	Order number
Magnetic fasteners DUO	A67-20

Mounting bracket magnet DUO

Application

This bracket allows the installation of the magnetic lock Duo. With the slit you can adjust the final position.

Order data	Order number
Mounting bracket magnet DUO	A67-21

Ball catches

Specification

PA-GF, black
 fixing screw: steel zinc coated

Mounting bracket ball catch

Application

This bracket allows the attachment of the ball catch. You can adjust the final position with the the slot.

Order data	Order number
Ball catches	A66-50
Spacer	A66-54

Order data	Order number
Mounting bracket ball catch	A67-51

Handle strip

Application

The handle strip is used as drawer handle. It's also possible to use it for doors and windows

Specification

Al, anodised in natural colour

Order data	Order number
Handle strip 200 mm	B65-52
Handle strip 300 mm	B65-53
Handle strip 400 mm	B65-54

Other length available as per request.

Arrester plate

Application

As door- or window arresters with fixing possibility. It is possible to screw the arrester plate through the slot and make it secure. It's also qualified as a simple connecting element.

Specification

Al, anodised in natural colour

Order data	Order number
Arrester plate	C62-10 (-S)*

Quick-release fasteners

Application

For the quick fitting and removal of paneling. Simply press the wing or slotted pin in with your thumb; a quarter turn releases it.

Specification

Brackets and bolts: stainless steel
Spacer ring: rubber

Order data	Order number	Order number	Order number
	L = 18	L = 24	L = 30

Quick-release fastener with a slotted pin	A64-20	A64-22	A64-21

Snap-lock

Application

The snap-lock comprises a door housing with a latch as well as a framework housing. Its versatile design allows the lock to be used for different widths of extrusion. Another advantage is that it is very easy to open and close.

Specification

GD-Zn, black
instant locking, 2 keys
4 M6 square nuts

Safety switches

Application

Safety switches are mandatory in many applications. If required by the customer, we will provide and set up the mechanical assembly. Simply send us the switch and we will integrate it in the structure.

Depending on the potential risk, the switches must fulfill various functions, e.g.:

- mechanical locking without power
- signal when door closed
- enabling/disabling of automatic processes

Locking handle

Application

Lockable machine doors, such as switch cabinets, service doors or easy access points, are often made with the industry standard locking handle. We also integrate these into our designs.

Order data	Order number
Snap-lock	A68-51

Sealing plates

Flat sealing element

Application

To seal the cut ends of manifold extrusions. Air, water, oil or other media can be supplied or drained off with the appropriate gas fittings.

Fixing kit*

Screws + threaded inserts

Specification

Al, anodised in natural colours
1/4" gas connection

Shaft clamping block

Shaft clamping block - straight

Shaft clamping block - 90°

Order data	Order number
Shaft clamping block - straight	L16-60
Shaft clamping block - 90°	L16-65

Application

A high-precision linear bearing system can be created very easily with the components, i.e. the shaft clamping block, the linear bearing block and the steel shaft. As there are two different shaft clamping blocks, the system can be assembled flexibly. The fixing centres combine well with the PVS® extrusions.

Specification

Aluminium, anodised in natural colours
 Scope of delivery including screws.

Linear sliding block

Specification

Housing: aluminium, anodised in natural colours

Linear bearing: steel, sealed on both sides, maintenance-free

Shaft support extrusion 40x100 Type L16-10

Application

The guide extrusion 40x100 is used for high load linear slides. Because of the steel shaft support on one side, the distance between the guides can be freely selected. The shaft is pressed into the designated slot. A stop can be attached to

the front face in the holes $\text{Ø} 6.8$ with a M8 thread.

The side plates or side construction must be specially designed for this guide, therefore they are only available on request.

Spacer for the roller shield

Grease scraper

Scope of supply

- 1 grease scraper
- 2 cycl. screws M5 x 12

Grease scraper support

Application

As a spacer for the roller shield to adjust the different sizes of the rollers.

Specification

Aluminium, raw
 1 pc for roller L=21.5
 2 pc for roller L=26.5

Application

The grease scraper is for two functions. On one hand, it cleans the steel bars and on the other it coat the steel bars with a grease film to protect it from rusting.

Specification

Shield: PA-GF
 grease scraper: grease-impregnated felt

Application

The support fits on the slide plate base 50 (L12-70). Together with the grease scraper the slide for a small linear guide is complete.

Specification

Aluminium, anodised in natural colours

Order data	Order number
Spacer	L16-40-04

Size 30	L30-20
Size 45	L45-20

Roller system

Application

The roller tracks, together with special clamps, are simply mounted to the Kanya 50, 40 and 30 base aluminium extrusions.

The roller track system can be used for all types of conveyance and removal of material and goods. Examples of typical applications

- Roller transport via gravity for all types of boxes
- Roller transport connections between workstations
- Roller conveyance to work benches
- Material roller transport within a machine production plant
- Accurate positioning of boxes

The range includes rollers with and without guide flange. All roller tracks are also available as ESD version.

Technical description

Roller tracks are made from bent steel sheets, galvanised, 0.8mm, width 36mm, overall height 36mm

Axes made from zinc-coated steel, diameter 3mm

Bore holes with diameter 4.1mm at the base of the roller track

Vertical load up to 40 kg per roller (lying on flat surface)

Roller tracks

Product advantages

The special shape of the steel sheet allows the roller track to close when under load. This significantly increases the resistance against twisting or bending.

Loads

The roller tracks (one pair) can be subjected to loads as follows, according to the length – see table below.

Clamping for easy fixing of roller tracks to extrusions and tubes.

Roller track adapter

Application

This roller track adapter can be screwed onto the 30/40/45/50 series base extrusions. The roller tracks are pushed in and attached to an extrusion structure.

Replacing or moving them is simple.

Order data	Order number
Roller track adapter	L80-90

Roller stopper

Anti-return

Application

This roller stopper can be used to finish off the roller tracks to make it easier to remove containers, transportation boxes or packages. The goods being transported slides onto the roller stop and comes to a standstill. The items being transported can now be removed without having to lift them.

Application

This element prevents the return of the item being transported. Installed in the right place, this easy-to-install element offers a great solution to the flow of material.

This product can also be used as a simple stop at the end of a roller track to prevent boxes or containers from falling off.

Extrusion tolerances – extract from EN 12020-02

1. Straightness tolerances

Cavity extrusions shall not exceed the values stated in the table for straightness tolerances h_1 . The deviation h_2 shall not exceed a maximum of 0.3 mm over any length of $l_2 = 300$ mm.

Length l_1 in m	bis 1	bis 2	bis 3
Tolerance h_1 in mm	0.7	1.3	1.8

2. Distortion Tolerance v

The distortion tolerance v for cavity extrusions subject to length is shown in the table.

Width b in mm Measurement Range		Flatness Tolerance v in mm for lengths in mm		
over	up to	- bis 1000	over 1000 up to 2000	over 2000 up to 3000
-	25	1.0	1.5	1.5
25	50	1.0	1.2	1.5
50	75	1.0	1.2	1.2
75	100	1.0	1.2	1.5
100	125	1.0	1.5	1.8

Diameter D/D_1 in mm	D Tolerance in mm	D_1
12	0 / +0.05	0 / -0.1
15	0 / +0.05	0 / -0.1
20	0 / +0.1	0 / -0.15
30	0 / +0.1	0 / -0.2
40	0 / +0.1	0 / -0.2
50	0 / +0.1	0 / -0.2

3. Angular Tolerance w

If side lengths are unequal, the angular tolerance relates to the angle of the shorter side.

Width b in mm		Inclination tolerance w in mm
over	up to	
-	30	0.3
30	50	0.4
50	80	0.5
80	100	0.6
100	120	0.7

4. Diameter D/D_1 Tolerances

The tolerances shown in the Table below relate to the Diameter D/D_1 in each case, as shown in the technical drawings.

Clamp Ring

Use

Normally used as a stop, or as a holder for limit switches or similar.

Nominal Diameter	Dimensions			D	KS	Weight in kg	Order number

30	52	20	40	20	30	M8	0.080	R03-15
40	62	25	50	20	40	M8	0.105	R04-15
50	72	30	60	20	50	M8	0.135	R05-15

Joining Clamp

Use

To extend tubes and as a stop for large forces.

Nominal Diameter	Dimensions			D	KS	Weight in kg	Order number	
	A	A1	B					
12	24	8	16	32	12	M4	–	on request
20	36	13	30	40	20	M6	0.085	R02-01
30	52	20	40	60	30	M8	0.225	R03-01
40	62	25	50	80	40	M8	0.395	R04-01
50	72	30	60	100	50	M8	0.625	R05-01

For diameter D tolerances, see page 224

Angle Clamps

Angle Clamp

Use

Attractive corner joint for normal loads.

For reasons of stability, it is recommended that tubes in angle clamp joints are cut at 45°.

Nominal Diameter	Dimensions		B	C	D	KS	Weight in kg	Order number
	A	A1						
12	24	8	16	32	12	M4	-	on request
20	36	13	30	36	20	M6	0.060	R02-02
30	52	20	40	52	30	M8	0.150	R03-02
40	62	25	50	62	40	M8	0.225	R04-02
50	72	30	60	72	50	M8	0.320	R05-02

T Clamp

Use

Cross joints where only one tube needs to be movable.

Nominal Diameter	Dimensions		B	C	D	KS	Weight in kg	Order number
	A	A1						
12	24	8	16	32	12	M4	-	on request
20	36	13	30	45	13	M6	0.080	R02-03
30	52	20	40	65	20	M8	0.215	R03-03
40	62	25	50	85	25	M8	0.365	R04-03
50	72	30	60	105	30	M8	0.560	R05-03

For diameter D tolerances, see page 224

Parallel Clamp

Use

To strengthen structures (by doubling) or to extend tubes on different levels.

Nominal Diameter	Dimensions		B	C	C1	D	E	KS	Weight in kg	Order Number
	A	A1								
12	24	8	16	42	9	12	24	M4	-	on request
20	36	13	30	66	13	20	40	M6	0.110	R02-04
30	52	20	40	100	20	30	60	M8	0.310	R03-04
40	62	25	50	130	25	40	80	M8	0.535	R04-04
50	72	30	60	160	30	50	100	M8	0.815	R05-04

Cross Clamp

Use

This is the most frequently used clamp. It can hold two freely movable tubes, offset at 90°.

Nominal Diameter	Dimensions		B	C	C1	D	E	KS	Weight in kg	Order Number
	A	A1								
12	24	8	16	38	9	12	13	M4	0.022	R01-05
20	36	13	30	58	13	20	22	M6	0.095	R02-05
30	52	20	40	84	20	30	32	M8	0.235	R03-05
40	62	25	50	104	25	40	42	M8	0.370	R04-05
50	72	30	60	124	30	50	52	M8	0.535	R05-05

For diameter D tolerances, see page 224

Cross Clamp with different Ø

Use

This is the most frequently used clamp. It can hold two freely movable tubes, offset at 90°.

Nominal Diameter	Dimensions		B	C	C1	D	d	E	KS	Weight in kg	Order Number
A	A1										
20 / 12	36	13	30	58	13	20	12	22	M6	0.102	R02-07.12
30 / 12	52	20	40	84	20	30	12	32	M8	-	on request
30 / 20	52	20	40	84	20	30	20	32	M8	0.255	R03-07.20
40 / 20	62	25	50	104	25	40	20	42	M8	0.420	R04-07.20
40 / 30	62	25	50	104	25	40	30	42	M8	0.400	R04-07.30
50 / 40	72	30	60	124	30	50	40	52	M8	0.585	R05-07.40

For diameter D tolerances, see page 224

Cross T-Clamp

Use

Tubes can exit from this clamp in three directions, but only the same two tubes as in the Cross Clamp (page 227) pass all the way through the joint.

Nominal Diameter	Dimensions		B	C	C1	D	E	KS	Weight in kg	Order Number
	A	A1								
12	24	8	16	40	9	12	13	M4	-	on request
20	36	13	30	65	13	20	22	M6	0.105	R02-10
30	52	20	40	98	20	30	32	M8	0.285	R03-10
40	62	25	50	125	25	40	42	M8	0.470	R04-10
50	72	30	60	155	30	50	52	M8	0.730	R05-10

Universal Clamp

Use

As its name implies, the four tube exits on this joint make it suitable for universal use.

Nominal Diameter	Dimensions		B	C	C1	D	E	KS	Weight in kg	Order Number
	A	A1								
12	24	8	16	53	20	12	13	M4	-	on request
20	36	13	30	82	30	20	22	M6	0.145	R02-11
30	52	20	40	122	45	30	32	M8	0.375	R03-11
40	62	25	50	162	60	40	42	M8	0.650	R04-11

For diameter D tolerances, see page 224

Horizontal Clamp

Use

This joint is normally used as a pedestal bearing. However, it can also be used as a holder for screwed-on parts.

Nominal Diameter	Dimensions										Weight in kg	Order Number
	A	A1	B	B1	C	D	I	O	P	KS		
12	28	12	35	16	15	12	25	6	4	M4	0.015	R01-60
15	45	22	65	30	20	15	50	7	8	M6	0.088	R15-60
20	45	22	65	30	20	20	50	7	8	M6	0.080	R02-60
30	60	28	95	40	30	30	75	9	8	M8	0.170	R03-60
40	72	35	95	50	40	40	75	9	10	M8	0.295	R04-60
50	82	40	120	60	50	50	100	9	10	M8	0.470	R05-60

Tube Cleat

Nominal Diameter	Dimensions										Weight in kg	Order Number
	A	A1	B	B1	C	D	I	O	P	KS		
30	60	28	95	40	20	30	75	9	8	M8	0.115	R03-65
40	72	35	95	50	20	40	75	9	10	M8	0.150	R04-65
50	82	40	120	60	20	50	100	9	10	M8	0.195	R05-65

For diameter D tolerances, see page 224

Vertical Clamp

This is the elementary component for a wide variety of constructions, whether as a flange, a build-on joint or a holder.

Nominal Diameter	Dimensions										Weight		Order Number
	A	A1	B	B1	C	D	F	I	O	P	KS	in kg	
12	28	12	35	16	32	12	-	25	6	4	M4	0.029	R01-50
20	45	22	65	30	45	20	25	50	7	8	M6	0.135	R02-50
30	60	28	95	40	65	30	50	75	9	8	M8	0.310	R03-50
40	72	35	95	50	75	40	50	75	9	10	M8	0.440	R04-50
50	82	40	120	60	85	50	50	100	9	10	M8	0.610	R05-50

For diameter D tolerances, see page 224

End Swivel Clamp

Use

The tube is firmly pressed into this clamp, making it particularly suitable for oblique connections. Can also be used for permanent swivel functions.

Nominal Diameter	Dimensions		B	B1	C	D1	I	O	P	Z	Weight in kg	Order Number
	A	A1										
12	28	12	35	16	15	12	25	6	4	17	-	on request
20	45	22	65	30	20	20	50	7	8	21	0.080	R02-70
30	60	28	95	40	30	30	75	9	8	31	0.190	R03-70
40	72	35	95	50	40	40	75	9	10	41	0.340	R04-70
50	82	40	120	60	50	50	100	9	10	51	0.585	R05-70

T-Swivel Clamp

Use

Chiefly used where tubes coming out of the joint must be swivelled in connection with all the other clamp joints.

Nominal Diameter	Dimensions		B	B1	C	D1	I	O	P	Z	Weight in kg	Order Number
	A	A1										
12	24	8	16	30	9	12	12	17	M4	-	on request	
20	36	13	30	45	13	20	20	31	M6	0.100	R02-13	
30	52	20	40	65	20	30	30	41	M8	0.255	R03-13	
40	62	25	50	85	25	40	40	51	M8	0.435	R04-13	
50	72	30	60	105	30	50	50	61	M8	0.700	R05-13	

For diameter D tolerances, see page 224

Cross Swivel Clamp

Use

To brace structures with oblique tube connections; also used like the T-swivel clamp.

Nominal Diameter	Dimensions										Weight in kg	Order Number
	A	A1	B	C	C1	D	D1	E	Z	KS		
12	24	8	16	38	9	12	12	13	17	M4	–	on request
20	36	13	30	58	13	20	20	22	31	M6	0.115	R02-14
30	52	20	40	84	20	30	30	32	41	M8	0.275	R03-14
40	62	25	50	104	25	40	40	42	51	M8	0.440	R04-14
50	72	30	60	124	30	50	50	52	61	M8	0.670	R05-14

For diameter D / D1 tolerances, see page 224

Horizontal Support

Use

The Horizontal Support is usually needed to close off adjustable units. However, it can also be used independently as a static or dynamic clamp.

Nominal Diameter	Dimensions												Weight		Order Number
	A	A1	B	B1	C	D	F	I	K	O	P	S	KS	in kg	
20	45	22	65	30	110	20	95	50	10	7	8	60	M6	0.360	R02-90
30	60	28	95	40	160	30	140	75	14	9	8	90	M8	0.845	R03-90
40	72	35	95	50	200	40	180	75	14	9	10	120	M8	1.390	R04-90

Other combinations on request; for diameter D tolerances, see page 224

Vertical Clamp

Use

The same uses as the Horizontal Support. It can also be used as a carrier for handling equipment which needs to be rearranged simply and quickly.

Nominal Diameter	Dimensions												Weight		Order Number
	A	A1	B	B1	C	D	F	I	K	O	P	S	KS	in kg	
20	45	22	65	30	110	20	95	50	10	7	8	60	M6	0.330	R02-91
30	60	28	95	40	160	30	140	75	14	9	8	90	M6	0.760	R03-91
40	72	35	95	50	200	40	180	75	14	9	10	120	M6	1.225	R04-91

Other combinations on request; for diameter D tolerances, see page 224

Universal Support

Application

Same use as the horizontal and vertical support but with the advantage that this component can be used as horizontal and vertical adjustable unit.

Nominal Diameter	Dimensions										Weight in kg	Order Number
	A	A1	B	C	D	E	O	K	S	KS		
20	36	13	30	110	20	25	6.5	10	60	M6	0.190	R02-30
30	52	20	40	160	30	50	8.5	14	90	M8	0.520	R03-30
40	62	25	50	200	40	50	8.5	14	120	M8	0.870	R04-30

Other combinations on request; for diameter D tolerances, see page 224

Universal Slides

Illustration with clamp and sliding bush

Application

Simple adjustable units can be built in modular form, in combination with various supports. The four threads are used to fix other structures in place.

Nominal Dimensions											Weight in kg	Order Number single-sided clamp	Order Number double-sided clamp	Order Number without clamp
Diameter	A	A1	B	C	D	E	I	M	K	S				
20	36	13	30	110	20	25	95	M6	10	60	0.200	R02-31 (-GL)*	R02-32 (-GL)*	R02-41 (-GL)*
30	52	20	40	160	30	50	140	M8	14	90	0.535	R03-31 (-GL)*	R03-32 (-GL)*	R03-41 (-GL)*
40	62	25	50	200	40	50	180	M8	14	120	0.870	R04-31 (-GL)*	R04-32 (-GL)*	R04-41 (-GL)*

* On request, we can supply the slide with sliding bushes: add -GL to the order number

Rectangular Extrusions

Can be supplied in warehouse length or cut to size.

Surface: untreated

Nominal Diameter	Dimensions		B	d	Weight kg/m	Order Number L = 3000 mm	Order Number cut to ... mm
	A	A1					
12	24	8	16	11,3	0.76	R01-95-00/3000 mm	R01-95-02/ ... mm
20	36	13	30	19,2	2.10	R02-95-00/3000 mm	R02-95-02/ ... mm

50	50 x 3	1.210	R05-97-00/5000 mm	R05-97-02/ ... mm

For diameter D tolerances, see page 224

Threaded Inserts

For aluminium tubes.

Material: aluminium

Nominal diameter	Dimensions		h	M	Order Number
	D	D1			
20	16	20	15	M10	R14-20
30	26	30	15	M10	R14-30
40	36	40	20	M16	R14-40
50	44	50	20	M16	R14-50

Levelling feet

Application

Variable height adjustment and level compensation.

Specification

Cup: PA-GF black
Bolt/locknut: 8.8 steel, zinc-coated

Material	Levelling flange diameter	Dimension: Thread M x L	Load capacity F	Order number with 3 x Ø9	Order number without 3 x Ø9
PA-GF	50	10 x 50	2500 N		B 42-50
	50	10 x 100	2500 N		B 42-00
	50	16 x 50	3500 N		B 44-50
	50	16 x 100	3500 N		B 44-00
	90	16 x 50	5000 N		B 45-50
	90	16 x 100	5000 N		B 45-00
Aluminium	90	16 x 50	10000 N	B 45-51	B 45-52 (-D)*
	90	16 x 100	10000 N	B 45-01	B 45-02 (-D)*

* These versions are also available with damping components: add -D to the order number.

Wheels

Application

Universally applicable, everywhere where mobility is required.

Specification

Shackle: Galvanized steel, ball bearing
Wheel: Rubber running wheel, ball bearing

Wheel	Ø	wide	hight	wheel-Ø	Thread dia. / M x L	Order number without brake	Order number with brake
Wheels	50	18	70	25	Ø 10,3	B 48-50	B 49-50
Wheels	75	25	97	30	Ø 10,3	B 48-75	B 49-75
Wheels	100	32	132	42	Ø 10,3	B 48-100	B 49-100
Wheels	100	32	132	42	M 16 x 25	A 48-100	A 49-100

Wheels	125	32	158	42	M 16 x 25	A 48-125	A 49-125

Other dimensions and conductive wheels can be supplied on request.

The complete range with more information can be found on page 164.

Plastic Caps

For Tube Clamps

For Aluminium Tubes

Nominal diameter	Order Number
20	R10-20
30	R10-30
40	R10-40
50	R10-50

Nominal diameter	Order Number
20	R11-20
30	R11-30
40	R11-40
50	R11-50

The tube clamp units are generally supplied with plastic caps.

Clamp Lever

All tube clamp elements can also be supplied with clamp levers:

Add ...-K or ...-2K to the order number.

Nominal Thread	Dimensions:					Order Number
M	B	G	H	L		
M6	45	29	25	-	R65-60	
M6	45	29	25	16	R65-62	
M6	45	29	25	32	R65-63

M8	63.5	43.5	38.5	20	R65-82*	
M8	63.5	38	31	40	R65-84	
M8	63.5	38	47	16	R65-81	

*Lever: plastic

Adjustable Units

The Kanya Adjustable Units have been specifically developed with low cost in mind. The modular kit principle means that joints can be assembled at reasonable prices. The customer is free to choose according to his requirements – the Adjustable Unit still remains a standard item. The selection includes three sizes with different adjustment ranges. The spindle end is manufactured according to your specifications, or is fitted with a handwheel.

Ordering Information

Examples:

VE - 20	1 2 5 0	9 0	3 1	- -	M 1 2 9 0	Ø 1 0 x 2 0
VE - 4 0	2 3 0 0	9 1	3 1	4 1	T R 1 6 3 0	- - - - - HR Ø 1 6 0

Warehouse items	Stroke	Support A/B	Slide 1/2	Spindle	Shaft end	Handwheel
VE20	-1500	R02-90 / -91 / -30	R02-31-GL / -41-GL	M12 x 1.75 / TR 12 x 3	as indicated	HR - Ø 80 / Ø 100
VE30	-2000	R03-90 / -91 / -30	R03-31-GL / -41-GL	M16 x 2.0 / TR 16 x 4	as indicated	HR - Ø 125
VE40	-2500	R04-90 / -91 / -30	R04-31-GL / -41-GL	M20 x 2.5 / TR 20 x 4	as indicated	HR - Ø 160 / Ø 200

See pages 221 – 224 for measurement information on the Supports and Slides

Other diameter and inclinations on request

Kanya supplies the Adjustable Units fully assembled.
Please enquire about additional items which we are able to supply.

Note Adjustable Units:

VE20 up to	900 mm
VE30 up to	1200 mm
VE40 up to	1500 mm

Adjustable Units

Use

Simple adjustment mechanisms with average precision and normal phase times. This adjustable unit is robust and reliable, and can be used wherever costs need to be kept down or wherever cost-effectiveness is the decisive factor.

Mechanical engineering, automation, laboratories, photographic studios, table adjustments, etc.

Versions

- ① with metric threaded spindle
- ② with trapezoidal threaded spindle and handwheel
- ③ with pneumatic cylinder

... or to your specifications.

The background of the entire page is a low-angle, upward-looking photograph of a modern building's facade. The building is composed of numerous vertical, metallic-looking panels that create a strong sense of height and architectural rhythm. The sky is a clear, bright blue. The lighting is bright, casting sharp shadows and highlighting the textures of the building's exterior.

<u>Term</u>	<u>Page</u>	<u>Term</u>	<u>Page</u>	<u>Term</u>	<u>Page</u>
20mm base extrusion	111–113	Clamping block base 50/40/30	150	F	
30mm base extrusion	99–110	Clamping block	151	Filler strips	180/181
40mm base extrusion	81–98	Clamping nuts	154	Flange extrusions	239
45mm base extrusion	67–80	Clamping rubber seal	187	Flat sealing element	204
50mm base extrusion	50–66	Clamping sealing strip	187	Floor bolting bracket	161
		Composite panels	175	Foot plates	161
A		Concave double-wheeled trolley	167	Frame extrusion	120
Acrylic glass	176	Concave roller	166	Front cover	173
Adjustable units	244/246	Connectors	132–139		
Allen key	146	Corner pieces	195	G	
Aluminium sheets	178	Counterweight extrusion	129	Grease scraper	213
Angle clamp	226	Covering cap for front cover	174	Grease scraper support	213
Angle extrusion	123–125	Covering cap for PVS®-connector	140	Grid extrusion	186
Anti-return	222	Cross-cable tie block	171	Guide extrusion	122
Anti-twist spigots	158	Cross clamp	225/227	Gusset plate	161
Arrester plate	201	Cross clamp with different Ø	220		
Attachment bracket	152	Cross swivel clamp	233	H	
Auxiliary extrusion	118	Cross T-clamp	229	H-strip	183
				Half-round threaded plates	153
B		D		Hammer nuts	155
Ball catches	199	Door stop profile	184	Handle strip	201
Base plates	161	Double bolting bracket	162	Handle strip extrusion	127
Box frame extrusion	119	Double clamping extrusion	121	Handles	196
Bracket	149	Double extrusion nuts	155	Hinge extrusion	126
Buffer	215	Double threaded plates	153	Hinges	189–192
		Double-wheeled trolley	167	Horizontal clamp	230
C				Horizontal support	234
C-guide rails	216	E			
Cable bridge	145	End caps	156	I	
Cable ducts	170/172–174	End stop	215	Inset lock	202
Caps	243	End swivel clamp	232		
Castors	164/165	Expanded metal	178	J	
Channel reducing strips	180/182	Expanding sleeve	158	Joining clamp	225
Clamp ring	225	Extrusion nuts	154	Joint base	193/194
Clamp lever	243				
Clamping block	127				

Term	Page	Term	Page	Term	Page
L		R		T	
Leg bolt-down socket	163	Recessed grip	198	Supporting extrusion	182
Levelling feet	159–160	Rectangular extrusion	238	Suspended guard fittings	188
Light extrusion nuts	154	Rectangular tube	128	T	
Linear sliding block	206	Retaining clips	170	T clamp	226
M		Ribbed rubber extrusion	186	T-bolts	152
Magnet nuts	155	Rod lock	202	Threaded inserts	157
Magnetic fasteners	199	Roller cover cpl.	214	Threaded plates	153
Micro chipboard	175	Roller stopper	222	Tie wrap	171
Mounting bracket and dowel	150	Roller system	218	Triple channel extrusion 30x15	117
Mounting brackets	148	Roller track adapter	221	T-swivel clamps	232
N		Roller tracks flat	219	Tube handle offset	197
Non-swivel castors	164	Roller tracks with guide flange	220	Tube handle straight	197
O		Rollers	166/212	Tubes	240
Octagonal extrusion	120	Runner extrusion	119	Tubes cleat	230
P		S		U	
Panel clamp extrusion	121/181	Safety-edge extrusion	185	U-clamping extrusion	122
Parallel clamp	227	Sealing plates	204	U-sealing strip	186
Perforated sheets	178	Self-cutting threaded inserts	158	Uniblocks	151
PET-G	177	Semi-circular sealing strip	185	Universal clamp	229
Polycarbonate	176	Shaft clamping blocks	205	Universal slides	237
Protective edge profile	185	Shaft clamping extrusions	208	Universal support	236
PVC foam plates	177	Shaft clamping extrusions 2-part	210	V	
PVS® direct connectors	143	Shaft support extrusion	206/207	«Velcro» cable ties	171
PVS® screw «Safe»	140	Single bolting bracket	162	Vertical clamp	231/235
PVS® superlight	144	Single bolting bracket, reinforced	162	Vertical supports	235
Q		Slide extrusion	168/169	W	
Quick-release fasteners	201	Slide plates	209/211	Wall rail 18x50	115
		Slides	211/217	Wedge extrusion	183
		Sliding hook	169		
		Slot extrusion	115/116		
		Snap-lock	203		
		Spacer for roller shield	213		
		Steel shafts	205		
		Steel wire mesh	179		
		Support extrusion	122
